Seeking Volunteers for a Research Study

We are looking for volunteers for a research study to see if whole body vibration therapy helps decrease toe walking in children with autism spectrum disorder.

To participate, children must:

- Be between the ages of 4 and 12
- Have a diagnosis of autism spectrum disorder and toe walking
 - Be independent with walking

This study is a one-time session that will take about an hour of your time.

Involves measuring gait and using the Hypervibe vibration platform.

If you would like your child to participate in this research opportunity, please contact:
