**For more than three decades, the Pine Belt family of car dealerships has provided unwavering support to Monmouth Medical Center Southern Campus (MMCSC) and the surrounding communities.** The Sickel family, led by Robert Sickel, President and CEO of Pine Belt Enterprises, together with the Trebino family, led by Michael Trebino, President of Pine Belt Automotive, have donated \$750,000 toward the naming of the Outpatient Infusion Unit, where patients are treated for cancer and receive other life-saving infusions on a daily basis.

**MMCSC together with Rutgers Cancer Institute of New Jersey, the state's only National Cancer Institute-designated Comprehensive Cancer Center, provides patients access to the most advanced treatment options including clinical trials, close to home.**

“Our families are proud advocates for Monmouth Medical Center Southern Campus, and the RWJBarnabas Health system,” explains Robert Sickel. “The hospital is a vital part of the Lakewood community and the compassionate care and excellence shown by the team in the Pine Belt Family Infusion Center mirrors our commitment to the community we all serve.”

Staffed by nurses who are specialized in oncology and chemotherapy, the Outpatient Infusion Unit at MMCSC is committed to personalized, quality care and education. It offers state-of-the-art technology in newly renovated semi-private and private rooms with reclining chairs and flat screen televisions to make patients as comfortable as possible.

## MMSC Earns High Spring 2023 Patient Safety Scores from Leapfrog Group

Monmouth Medical Center Southern Campus is one of four RWJBarnabas Health facilities awarded with "A" Hospital Safety Score ratings by the Leapfrog Group, an independent national nonprofit run by employers and other large purchasers of health benefits.

"The Leapfrog ratings reflect the staff and system's commitment to providing the highest quality of care for patients," said Eric Carney, President and Chief Executive Officer of MMC and MMSC. "We are proud to continue to deliver the best care possible to every patient."
