

15th Annual

Colorectal Cancer Awareness Symposium

Tuesday, March 26

Preventing colorectal cancer is our goal.

5:30 – 7:30 pm

Auditorium
Community Medical Center
99 Highway 37 West
Toms River

'45 is the new 50.' What does that mean to you?

According to the American Cancer Society, it is now recommended that people with an average risk of colorectal cancer begin regular screenings at 45 instead of 50.

We want you to know about the latest advances in colorectal cancer prevention, so join our physician experts and nurses for an update on prevention strategies, risk factors, and more.

Dinner, valet and free parking are provided.

This health event is free but seating is limited.
Call 1-888-724-7123 to register today!
