

Medical Group

The Department of Pediatrics at Saint Barnabas Medical Center presents:

RWJBarnabas Health Children's Kidney Center Annual Symposium

Prevention & Treatment of Kidney Disease in Children

GoToWebinar

Wednesday, October 28, 2020

5:00 to 7:00 pm

Virtual Symposium

Early recognition and treatment of renal disorders in children can delay progression and may even prevent the development of chronic renal failure, minimizing neurological deficits and growth retardation. Recent technological breakthroughs and better understanding of pediatric kidney disease has led to improved care of infants and children with various nephropathies.

This program has been specifically designed to provide an update for pediatricians, pediatric urologists, pediatric sub-specialists and nurses regarding renal disease from the neonatal period to late adolescence.

Topics and Presenters

▶ **Dysfunctional Bladder, Bowel and the Kidney**

Gina Cambareri, MD

Pediatric Urologist, Morristown Medical Center

▶ **Telemedicine: A Virtual Reality in Nephrology**

Shefali Vyas, MD, FAAP

*Associate Director, Children's Kidney Center, RWJBarnabas Health;
Assistant Clinical Professor in Pediatrics, UMDNJ*

▶ **The Kidney and Brain Connection**

Rajeshwari Mahalingam, MD

*Director, Tuberous Sclerosis Center, Pediatric Neurology and
Epilepsy, Institute of Neurology at Saint Barnabas Medical Center*

▶ **Renal Manifestations of COVID-19 Infection**

Isabel Roberti, MD, PhD

*Director, Children's Kidney Center, RWJBarnabas Health;
Associate Professor of Pediatrics, Mount Sinai School of Medicine*

Learning Objectives

Participants will be able to:

- ▶ Establish an evaluation scheme for children with dysfunctional bladders and optimize urological approach in order to prevent renal damage.
- ▶ Recognize the various options and benefits of telemedicine in evaluating and treating children with kidney conditions.
- ▶ Define the relationship and impact of various neurological diseases in the kidney function and vice-versa.
- ▶ Identify the renal manifestations of COVID-19 infection and consequences of potential therapies used.

CME Information

CME certification has been requested.
