

The World's First and Country's Only Philips 1.5T Digital Wide Bore MRI

Now Available at the Saint Barnabas Imaging Center

The Saint Barnabas Ambulatory Care Center has now added the Philips Ingenia 1.5T Wide Bore Digital High Definition MRI to the MRI Imaging Suite.

What is MRI?

Magnetic Resonance Imaging (MRI) is a highly advanced diagnostic test that provides detailed images of the body. It uses a large magnet, radio waves and a computer to scan your body and produce particularly clear pictures that cannot be seen on conventional X-rays.

Superior Care

- The Saint Barnabas radiologic team provides the highest quality imaging services to New Jersey residents.
- The team consists of board-certified licensed radiologists with advanced fellowship training in neuroradiology, musculoskeletal and body imaging
- MRI advanced registered technologists
- On-site registered nurses

Features and Benefits

- Highest resolution images available
- Remarkable speed reduces patient exam time and patient repositioning
- Designed with all size patients in mind
- More space reduces patient anxiety
- We participate with all major insurances
- Immediate appointment availability
