infusion treatments  
administered in our  
new Infusion Suites

## The Health of Our Community Remains Our Priority

The mission of Clara Maass Medical Center is to ensure that all patients have access to the best health care available close to home when they need it most. With the challenges of the global pandemic, Clara Maass Medical Center was able to continue to provide care and support to the communities we serve. Our program focus shifted and we began providing all residents in need with the tools necessary to monitor their health in the face of social distancing. With support from generous donors, we were able to purchase thermometers, glucose meters, and other supplies necessary to keep our communities healthy. Clara Maass Medical Center is able to provide the highest level of care to all of our patients thanks in part to donors like you.

# WE MADE AN IMPACT TOGETHER

A new, state-of-the-art MRI suite at Clara Maass Medical Center (CMMC) was the vision of a dedicated team of healthcare professionals. The vision was made reality by the Healthcare Foundation of New Jersey (HFNJ). HFNJ, an independent, endowed grant-making organization, provided \$534,000 in direct funding for the new suite. The organization also matched the \$250,000 raised by the Foundation at Clara Maass for the project. Clara Maass continues to make advancements in care, and donors have been critical every step of the way. Recent examples include a new hybrid OR, upgrades to the Emergency Department and Labor and Delivery Suites, digital mobile ultrasounds and robots that disinfect rooms with UV light.

A visit to the Emergency Department is never the best day of a person's life. But, at Clara Maass Medical Center, emergency medicine specialists are determined to make every visit a calm and efficient one. Since the completion of a comprehensive renovation and expansion, the Emergency Department at Clara has a welcoming new entrance for the 80,000+ patients they see each year. Inside this state-of-the-art facility, the expansion includes an adult observation unit with additional beds; a separate pediatrics area with 10 new treatment rooms; and a discharge area where patients can stay while waiting for further instructions or for transportation. There is also a new consultation room for private conversations with a nurse or physician for patients and their families.

Through the NHL's Hockey Fights Cancer initiative, the New Jersey Devils supported the renovation of the Infusion Center at Clara Maass. We are so grateful for these funds, which allowed for additional privacy and comfort for our patients. The renovated Infusion Center features six private bays, each equipped with state-of-the-art infusion chairs. The Devils' Hockey Fights Cancer event raises money through game-used stick and jersey auctions, puck and T-shirt sales and a raffle.
