

The Statewide Hispanic Chamber of Commerce of New Jersey supports and partners with RWJBarnabas Health to advance the health, well-being, and economic stability of the communities we serve throughout New Jersey. Our partnership reflects a shared commitment to ensuring that our Chamber members, individuals, families, and workers have access to the resources and care they need to thrive.

Support from RWJBarnabas Health strengthens our ability to serve as a trusted connector within the communities we represent, particularly within New Jersey's Hispanic population, which plays a vital role in the state's workforce, small-business economy, and overall growth, which means \$127 billion in GDP. Together, we recognize that economic opportunity and community health are deeply connected, and that long-term prosperity depends on healthy, informed and supported residents.

State-appropriated funding enables RWJBarnabas Health to sustain and expand this essential work with partners like us. These public investments reinforce strong community partnerships, improve access to care, and support collaborative efforts that address health needs while strengthening the broader economic and social fabric of New Jersey. The impact extends beyond any single organization, contributing to healthier communities and a stronger, more resilient state economy.

We value this partnership and are eager to continue working alongside RWJBarnabas Health to support the well-being of New Jersey's Hispanic communities. Continued investment in this work is critical to sustaining services that improve quality of life and support shared growth across the state.

Sincerely,

Carlos Medina
President & CEO
Statewide Hispanic Chamber of Commerce of New Jersey
