

Kessler Foundation has teamed up with Children's Specialized Hospital to research new ways of helping to improve the lives of children.

We are seeking children who are willing to volunteer to be research participants in our study

Attention Training

If your child:

- has sustained a **concussion** or has a **diagnosis of Attention-Deficit Hyperactivity Disorder**
- is between the ages of 10-17
- has no other neurological illness
- is able to speak and read English fluently

They may be eligible to participate in a new study examining whether an attention program called the Attention Process Training-3 (APT-3) can improve the attention of school-aged children diagnosed with ADHD or children who have a history of concussion.

IRB APPROVED: 8/30/2019
EXPIRATION DATE: N/A
KESSLER FOUNDATION

What does it require?

- **45 minute screening evaluation for full study inclusion**
- **8 weeks of participation**
 - Week 1: 2 hour visit for paper-and-pencil attention tests and questionnaires
 - Weeks 2-7: During which your child has a *50/50 chance* of either starting the APT-3 training right away or serving as a wait-list with a delayed start before beginning APT-3 training
 - Week 8: 2 hour visit for paper-and-pencil attention tests and questionnaires
- **APT-3 Training consists of 45 minutes to 1-hour sessions twice per week for 6 weeks or once a week for 12 weeks**

Testing can take place at Kessler Foundation in East Hanover, NJ or a Children's Specialized location closest to you. You will be compensated for your child's time.
