

Children's Specialized Hospital's Down Syndrome Center of Excellence

At Children's Specialized Hospital's Down Syndrome Center of Excellence, we provide comprehensive and compassionate care for children with Down Syndrome and their families through a wide variety of medical and therapeutic services that support development, learning, and skill acquisition.

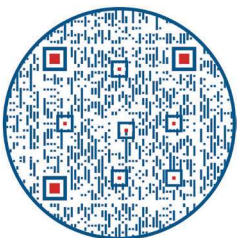

Clinical Program

If your child has Down Syndrome and is between 0 and 21 years old, they can receive a multidisciplinary assessment in our Center of Excellence's clinical program, led by a physician specialized in the care of children and adolescents with Down syndrome. During an initial visit, the doctor will meet with you to learn more about your child's medical, behavioral and emotional health. A team-based visit will follow where occupational, physical, and speech therapists will collaborate with the physician to evaluate your child's motor, feeding, adaptive and communication skills. A team-based evaluation is about 2 hours long. We encourage families to bring a snack and a favorite toy, to make your child comfortable in a new environment.

Therapies & Medical Services

Children's Specialized offers a wide range of therapies and specialty supports. Your Down Syndrome Center of Excellence team will partner with you to figure out which of these services and specialists may be right for your child:
