ABOUT THE SYMPOSIUM

This conference, presented by RWJBarnabas Health Heart and Vascular in partnership with The Cardiovascular Care Group, will provide vascular technologists and those involved in interpreting noninvasive vascular studies training focused on the care of patients with vascular diseases. It is designed to provide a full overview of the main disease processes that impact the vascular system and will offer opportunities to learn about the latest advances in vascular diagnosis. A panel of experts will share their knowledge in a setting where ideas and information can be shared and exchanged.
