# Community-Based Recovery Support Services

**Tackling addiction together.** 

Community-Based Recovery Support Services 2023 Yearly Report January 1 – December 31, 2023

Institute for Prevention and Recovery

#### In This Report

In 2023, there were 807 unique participants served by the RWJBarnabas Health (RWJBH) Institute for Prevention and Recovery (IFPR)'s community-based recovery support services. IFPR's Support Team for Addiction Recovery (STAR) program served 406 unique participants, Monmouth County Case Management staff served 79 unique participants, the Monmouth County Innovation Program served 53 unique participants, and the Hudson County Family Recovery Support Program (FRSP) served 269 unique participants.

The 2023 Yearly Report presents program updates and information on the population served, services rendered, and program outcomes. Throughout this report, "Unknown" consists of responses of "do not know" or "refused" and missing data. Additional data is available in the Appendix. The information included in this report is subject to change.

#### Program Background

The IFPR STAR program provides 24/7 community-based case management and recovery support services to individuals with opioid and/or stimulant use disorder in Essex, Hudson, and Middlesex counties. STAR primarily serves individuals admitted to emergency departments due to an opioid overdose, individuals discharged from licensed residential substance use disorder (SUD) treatment facilities, and individuals released from incarceration. The program works to address all of the Substance Abuse and Mental Health Administration (SAMHSA) Eight Dimensions of Wellness (emotional, spiritual, intellectual, physical, environmental, financial, occupational, and social) by providing the tools and resources needed to remove barriers to achieve long-term recovery including access to **All Recovery Meetings (see page 13)**. IFPR All Recovery Meetings are facilitated by NAADAC-certified Recovery Specialists and provide social support for those seeking or maintaining recovery, as well as family members, friends, and supporters of those influenced by substance use.<sup>1</sup>

The Monmouth County Case Management and Innovation programs provide community-based recovery support services for individuals with SUD in Monmouth County. A team of certified Recovery Specialists and Case Managers deliver recovery-oriented coordination of care consisting of linkages to SUD and mental health treatment, community resources, and All Recovery Meetings.

IFPR, in collaboration with Monmouth County Assisting Community Through Services (ACTS), developed the Monmouth County Recovery Collaborative (MCRC) to increase access, eliminate barriers, and better coordinate services for Monmouth County residents. Participants include law enforcement; treatment, family support, and case management agencies; peer support providers; Recovery Specialists; and education and housing providers who address social determinants of health including substance use, mental health, health care, housing, finances, transportation, legal services, employment, and family needs to provide full wraparound services.

#### **Program Background (continued)**

IFPR's Hudson County FRSP provides recovery support services through family-based training sessions and All Recovery Meetings to increase support, outreach, education, and assistance for family members and loved ones affected by SUD. The Lead Recovery Specialist also conducts outreach and information sessions throughout the community to receive referrals and connect families to the FRSP.

#### **Program Updates**

On August 1, 2023, the Hudson County community-based programs partnered with Operation Helping Hand and the Hudson County Community Action Corporation to participate in the National Night Out event, an annual community-building campaign that promotes policecommunity partnerships and neighborhood camaraderie. The team distributed flyers to educate the community about overdose awareness.

In 2023 Quarter 3, the Monmouth County community-based teams attended the Monmouth County Recovery Court Resource Fair and connected with Recovery Court members, providing education about available services. Monmouth County Case Managers and Recovery Specialists were also invited to present an overview of services and resources to Honorable Judge Paul Escandon and his team at the Monmouth County Courthouse.

In September 2023, Keisha Brewer, Essex County STAR Case Manager, joined IFPR's team of Clinical Support Supervisors. As part of the Clinical Support team, she will provide support and professional development guidance to recovery specialists following the peer support standards of SAMHSA's core standards and NAADAC's code of ethics.

On October 3, 2023, the Monmouth County Case Management and Innovation teams attended the ribbon-cutting ceremony for the student center at Brookdale Community College, where Monmouth County Recovery Specialists began hosting a weekly in-person All Recovery Meeting in September 2023. Meetings are held on Tuesdays at noon and are open to all students, community members, friends, and loved ones interested in initiating or maintaining recovery.

On November 15, 2023, the Monmouth County community-based teams attended a Friendsgiving event with the Phoenix Recovery Center at Kula Farms in Asbury Park and on December 16, 2023, the Hudson County FRSP hosted an in-person holiday event at St. John's Lutheran Church, located in Jersey City. Individuals in attendance shared dinner and stories of their unique recovery journeys.

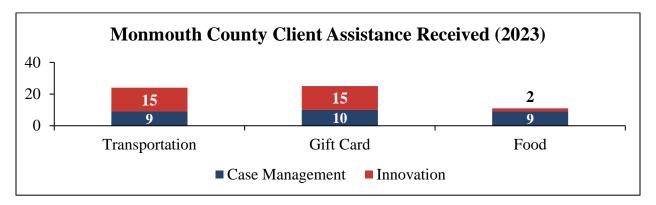

In December 2023, Shay Watson, Monmouth County Case Manager, collaborated with Castiglione Events to organize a virtual giving tree. Individuals from the community provided generous donations of holiday gifts for children at Epiphany House, a recovery housing facility for women with dependent children, located in Asbury Park. The Monmouth County Case Management team plans to continue hosting this event annually.

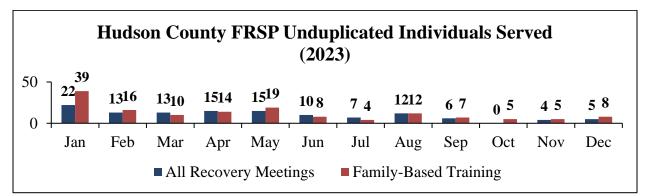

3

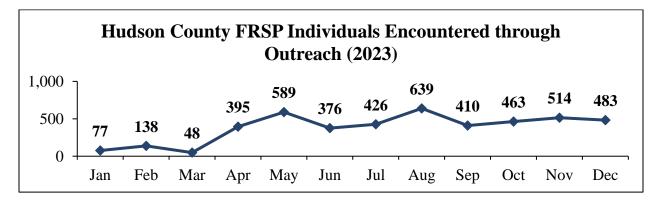

#### Program Updates (continued)

In 2023, the Monmouth County Case Management and Innovation Programs began providing client assistance. Since May 2023, Monmouth County staff have provided **transportation** services including bus passes and non-emergency medical transportation through Uber Health to 24 individuals, gift cards for groceries, rental assistance, business attire, or other expenses to 25 individuals, and food for 11 individuals.

In March 2022, IFPR received funding from Hudson County to implement the Hudson County FRSP. In 2023, **122 unique participants were served through All Recovery Meetings and 147 unique participants** through family-based support sessions, and conducted **outreach with more than 4,500 individuals** at shelters, food pantries, treatment facilities, and other community locations and events throughout Hudson County.

#### **Success Stories**

The Essex County STAR team worked with a woman who was recently discharged after successfully completing the program. When she initially enrolled in the program, she was struggling to maintain her recovery and a relationship with her family. She worked with a Recovery Specialist to establish short- and long-term goals for her recovery. Throughout her time in the STAR program, she gained employment, housing, and transportation, improved her relationship with her family, and has expressed her gratitude for the support she received from STAR.

The Hudson County STAR team worked with a man who successfully completed the STAR program. He was able to gain employment and move out of supportive housing. His determination, resilience, and commitment have led to a successful outcome. His story inspires others, demonstrating that overcoming addiction and rebuilding one's life is possible with the proper support and personal dedication. We celebrate his achievements and wish him continued success.

In October 2023, a man with substance use disorder and was without housing or transportation enrolled in the Middlesex County STAR program. A Case Manager was able to provide linkages to housing and other resources such as food and clothing. He received the support needed to overcome minor setbacks, is now employed, actively involved in his church and other recovery-based programs, and is working to re-establish a relationship with his children.

An individual who was referred to the Hudson County FRSP through Recovery Court began attending family support sessions after losing their child to an overdose and facing their own substance use disorder. They were able to share their story, connect with other individuals, and develop skills to cope with their child's death and maintain their own recovery.

In June 2023, an individual enrolled in the Monmouth County Innovation program and has received both case management and recovery support services. He recently obtained stable housing, gained employment, and is grateful for the support he has received from the Innovation program.

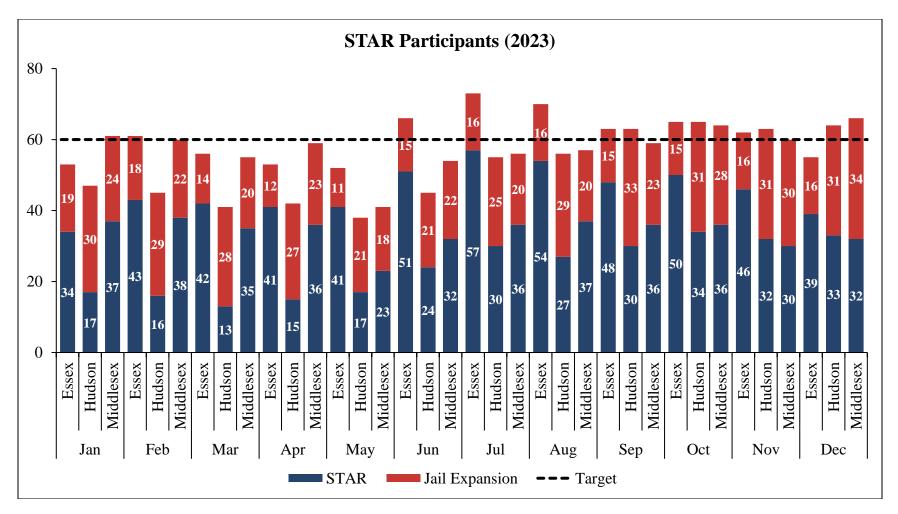

Since April 2023, the Monmouth County Case Management team has worked with a woman who was unemployed, unhoused, and struggled with her mental health. She recently gained employment, moved into a new apartment, and addressed her legal issues. She was also linked to counseling services and is thankful for the support, referrals, and resources that the Monmouth County Case Management program has provided.

<sup>5</sup> 

#### **Population Served**

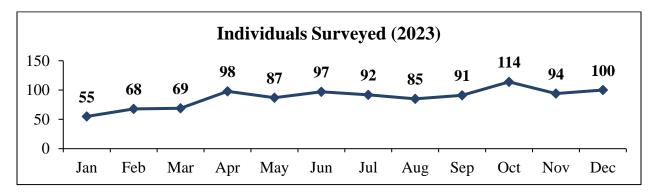

In 2023, **406 participants were served** in Essex, Hudson, Middlesex, and Monmouth counties. Recovery Specialists and Case Managers completed **1,050 participant surveys** in 2023. There were 541 Surveys in 2022, 617 surveys in 2021 and 574 surveys in 2020.

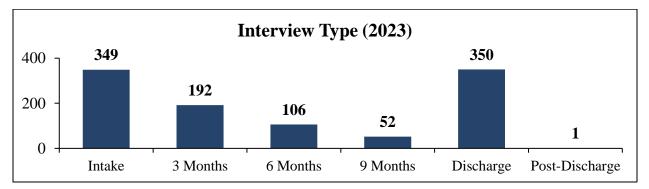

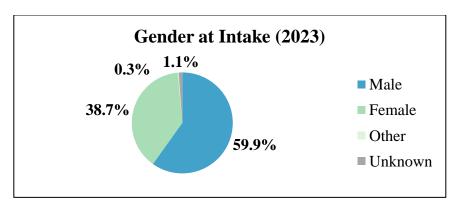

#### **Population Served (continued)**

The STAR Participant Survey is administered to participants of STAR and the Monmouth County Case Management and Innovation programs at intake; three-, six-, and nine-months postintake; at discharge; and every six months post-discharge. In 2023, there were **1,050 participant surveys completed and 349 were new intakes**, accounting for approximately one-third of surveys. The total number of surveys is not reflective of the number of unique participants.

In 2023, the majority (59.9%) of the participants surveyed at intake were male. Most participants were between the ages of 26-44 (55.3%) and 45-64 (37.2%). More than one-third of participants (35.8%) were white, 32.1% were Black, and 21.5% were Hispanic/Latino. At intake, the majority of participants (71.6%) were covered by Medicaid, 11.5% were employed, and approximately 10% were unhoused or residing in a shelter.

#### Services and Referrals

Enrollment in STAR, Monmouth County Case Management, or Monmouth County Innovation enables participants to receive access to both recovery support services and case management services. Recovery support services includes receiving guidance and support throughout the recovery process from individuals who have experience in the principles of recovery, and case management services include addressing individuals' needs and providing referrals or linkages to community resources. During intake, **83.7% of participants accepted recovery support services and 95.4% accepted case management services.** Community-based Recovery Specialists and Case Managers **provided more than 11,000 referrals** to recovery community organizations, self-help services, transportation, housing, and other community resources.

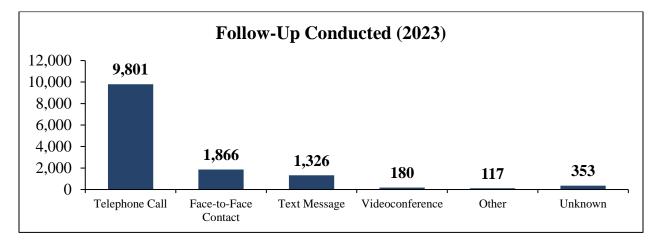

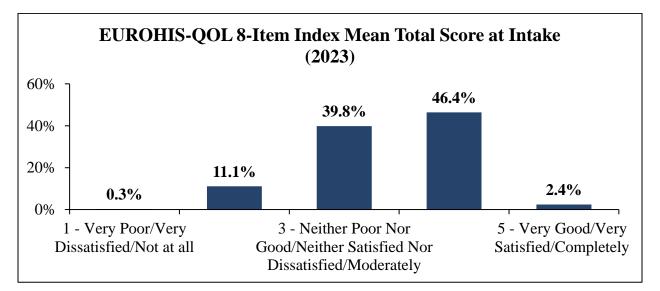

Institute for Prevention 10 and Recovery

#### **Program Outcomes**

In 2023, community-based Recovery Specialists and Case Managers **attempted approximately 9,800 telephone calls and more than 1,800 face-to-face contacts** to participants.

Participants' quality of life (QOL) and recovery self-efficacy are assessed during intake; three, six, and nine-month follow-up; discharge; and post-discharge surveys using the EUROHIS-QOL 8-item index and Recovery Empowerment Scale (RES), respectively. At intake, 39.8% of the participants surveyed reported being neither satisfied nor dissatisfied with their QOL and more than half (57.6%) of participants agreed they had enough self-efficacy to sustain their recovery. Of the 138 participants surveyed at three-month follow-up, **38 participants (27.5%) reported a one- to two-point increase in QOL and 20 out of 139 participants surveyed (14.4%) reported an increase in recovery empowerment.** Of the 33 participants surveyed at nine-month follow-up, **16 participants (48.5%) reported an improvement in QOL and nine out of 33 (27.3%) reported an improvement in recovery empowerment.**
