

Peer Recovery Program (PRP)

Tackling addiction together.

The RWJBarnabas Health Peer Recovery Program (PRP) provides recovery support services for all individuals who present with substance use disorder in hospitals, ambulatory care settings and in the community.

The goal of the program is to open a window to recovery. A certified Peer Recovery Specialist works with each individual, along with a navigator who provides screenings and assessments, warm handoffs to the appropriate level of care, and continued support through the recovery process.
