The DAISY (Diseases Attacking the Immune SYstem) Award is an international recognition program that honors and celebrates the skillful, compassionate care nurses provide every day. The DAISY Foundation was established by the family of J. Patrick Barnes after he died from complications of the auto-immune disease ITP in 1999. During his hospitalization, they deeply appreciated the care and compassion shown to Patrick and his entire family. When he died, they felt compelled to say "thank you" to nurses in a very public way.

DAISY Award Nomination Criteria

The DAISY criterion incorporates the IOM six aims of safety, patient-centeredness, effectiveness, efficiency, timeliness, and equity. These aims have been embraced by Jersey City Medical Center to ensure the best care possible.

All nominees should exemplify at least one of the following criteria:

- Demonstrates the importance of communication in the delivery of quality and safe patient care as evident by working in conjunction with the multidisciplinary team in providing quality safe patient care
- Demonstrates commitment to the development and implementation of organizational goals, priorities, and strategies as evident by committee, council or initiative involvement
- Demonstrates excellence in the delivery of individualized patient care
- Delivers quality and safe patient care guided by policies, procedures, and standards
- Implements current evidence-based practice by developing policy, educational material for patients and families, and/or co-workers
- Promotes, designs, develops, and implements patient safety and quality initiatives or programs that increase safety and quality care, such as reduction in nosocomial wounds, falls, failure to rescue and/or maintaining 95% or higher compliance in core measures
- Initiates or participates in research with outcomes related to patient safety and quality
- Promotes safety and quality patient care by contributing to committees at the local, state, and or national level
