Thank you for choosing Jersey City Medical Center, a RWJBarnabas Health facility, and trusting us with your healthcare needs. We take this responsibility very seriously. We will do all we can to provide you with an excellent patient care experience. You can feel confident that Jersey City Medical Center has among the finest physicians, nurses, healthcare professionals and support staff in the state. The hospital serves as a regional referral, teaching hospital and provides the highest level of care for women and infants, trauma and cardiac patients. Our professionals use the latest technologies and procedures to provide you with state-of-the-art care and compassion. Our mission is Enhancing Life and our priorities are Patient Safety, Patient Engagement/Satisfaction and Clinical Quality. Our goal is to be a nationally recognized hospital.

Providing you with a positive patient experience is central to all we do. Your feedback about your experience is highly valued. After you leave the hospital, you may receive a confidential survey in the mail. Please know that the leadership team reviews all responses and uses them as part of our ongoing quality performance improvement programs. Your responses are grouped together to provide us data and your name is never shared by the survey company.

We are proud of our efforts. Members of our hospital staff are focused on every aspect of your care. We will keep you informed about testing and treatment, and help you plan for discharge. Our staff prides themselves on being responsive to your needs and concerns in a timely manner. If you have any questions or special needs, please let us know. We are striving and working diligently to provide you with the best possible care and are here to help you in whatever way we can.

Once again, thank you for choosing Jersey City Medical Center, a RWJBarnabas Health facility. I am honored you have entrusted us with your care.

Sincerely Yours,
Joseph F. Scott, FACHE
President and CEO
The Jersey City Medical Center is located on a 15-acre campus overlooking the New York Harbor and Liberty State Park. The campus presently includes three facilities, the Wilzig Hospital, the Provident Bank Ambulatory Center, and the Medical Office Building, which offers many outpatient services and also houses the Cristie Kerr Women’s Health Center. The hospital serves as a regional referral, teaching hospital and provides the highest level of care for women and infants, trauma and cardiac patients. The Jersey City Medical Center is a teaching affiliate of several medical schools. Inside our spacious facility, natural light bathes your room and the Statue of Liberty gleams outside your window. All around you, the best and brightest medical professionals use the latest technologies to provide you state-of-the-art compassion. Our hospital is the only Magnet-Designated Hospital for Nursing Excellence in Hudson, Union or Essex counties.

We have procedures in place to help you and your family work with our doctors, nurses and staff to get the most from your hospital stay. Please take a few minutes to review these guidelines with your loved ones.

Visiting Guidelines
Jersey City Medical Center (JCMC) welcomes visitors and regards them as an important part of your care team. Visitors should enter the hospital through the main lobby entrance, which is located at the circular driveway. The hospital address is 355 Grand Street (corner of Grand and Jersey Avenues). After regular hours, visitors will need to use the Emergency Department entrance.

All visitors must obtain a picture pass provided by the hospitality desk. Visitors must present a driver’s license, valid state or county photo ID. (Foreigners may use their valid passports, driver’s licenses or green cards). JCMC cannot deny visits based upon race, color, national origin, religion, sexual orientation, gender, gender identity/expression or disability, and patients have the right to choose who may or may not visit them.

Jersey City Medical Center offers an open visitation policy. However, to provide our staff with the space it needs to provide the best patient care, we have the right to limit the number of visitors in your room at one time. Children who are free of infectious illness also may be permitted. Please check with the nurse on the unit.

Visitors Protecting Our Patients
Visitors are kindly requested to check with the nurse if you are bringing outside food to the patient.

Visitors need to have their visitor pass visible.

If a patient is in isolation, visitors must use protective equipment and handwashing. Please stop at the desk prior to entering the patient’s room. All visitors must comply with wearing any protective gear (gloves, masks, gowns) if told to do so. This is for the patient’s protection and also for the visitor’s protection. Visitors will be expected to show identification.

Visitors should avoid close contact with sick patients and wash their hands or use alcohol-based hand sanitizer before and after coming into contact with a patient. To protect patient privacy, your visitors should stay in your room, waiting rooms, the main lobby or the cafeteria area.

Safe Patient Handling Program
Jersey City Medical Center is committed to providing safe care to patients and being a safe workplace for employees. Our safety program includes the use of safe patient handling devices when caring for the
In your room, we have a whiteboard. It has important information for you from our caregiver team. Please ask your caregiver questions about your plan of care.

patient. The devices will be used to handle, move, transfer, lift or change the position of the patient based on the patient’s condition. Manual lifting of the patient will be kept to a minimum.

**Who needs a lift? Patients who:**
- Need help to get in and out of bed, a chair or other surface.
- Cannot bear weight on at least one leg.
- Lack upper body strength.
- Cannot follow simple commands.

**Our goals are to:**
1. Promote safety and comfort for our patients.
2. Improve quality of life for our patients by promoting patient mobility and independence.
3. Help to prevent muscular-skeletal injuries in healthcare providers.
4. Establish a culture of safety and dignity during lifts and transfers.
5. Enhance patient outcomes.

**Lactation Room**
We have a lactation room for patients, visitors and staff open 24 hours a day. If you have any questions or concerns about breastfeeding, call our 24/7 hotline at 201-915-2000, ext. 2339.

**Whiteboard in Your Room**
The whiteboard in your room. It has important information for you from our caregiver team. Please ask your caregiver questions about your plan of care.

Handicapped parking is also available. There are automatic doors located on the ground floor entrance for easy accessibility. Please check with your case manager. We also have valet parking for visitors available during weekday visiting hours. Please pull into the circle.

Please note: Parking is not permitted on Jersey Avenue until after 3 p.m. Monday through Friday.

**Calling Your Nurse**
A nurse call button is within your reach whenever you are in bed. Press the “nurse” button and a staff member will answer your call promptly.

**Leave Your Valuables at Home**
If you have valuables, such as jewelry, cash or keys, please give them to a relative or friend to take care of during your stay. Contact lenses, eyeglasses, hearing aids and dentures should be stored in a container or case labeled with your name in your bedside table when not in use. Please don’t put them on your bed or food tray or wrap them in tissues or napkins—they may be damaged or lost.

Never leave your personal property unattended—even temporarily. Never bring your own oxygen tank, wheelchair, cane or walker.

**Interpreters**
We have multilingual staff available to interpret for you during your stay. The Language Line also is available for spoken language interpretation either in person or via the internet. The Video Language Line is available for American
Sign Language (ASL) interpretation. Please let your nurse know if you are in need of these services and they will be arranged for you.

**Rapid Response Team – Medical Emergency**

A person’s condition can change suddenly, including symptoms that could be considered life-threatening. Quick assessment and treatment should be initiated as soon as possible. Some examples are: chest pain, difficulty breathing, change in mental status (confusion, unresponsive, slurred speech), large amount of bleeding, new onset or uncontrolled pain, or increased weakness (especially if on one side of the body). Anytime you notice a significant, serious, worsening change in a person or patient’s condition (including yourself), call the hospital operator by dialing 8 while on hospital property to initiate the Rapid Response Team.

**Who can call a Rapid Response at Jersey City Medical Center?**

Anyone who observes a person (patient, visitor or staff member) with a change in the patient’s condition that requires immediate medical attention. The Rapid Response Team will respond and assess the patient. When you dial 8, inform the hospital operator that you need the Rapid Response Team. Give as much information as possible including the patient’s name, room number and location, and stay with the patient until the Rapid Response Team arrives.

**Telephone**

Upon purchasing your phone service, you will be able to receive phone calls directly and make personal phone calls to the local calling area (Hudson County and parts of Bergen and Essex). A complete list of local calling exchanges can be obtained from our Telephone/TV representatives. Calls outside the local calling area will require third-party billing (charging to a home phone, calling collect or using a calling card). For your convenience, calling cards are sold in our gift shop on the first floor.

You must dial 9 plus the number to make a call outside the hospital.

A TDD (telecommunication device for the deaf) setup telephone and amplifier is available upon request. Please let our hospital staff know of your need for these services on or before your admission.

**TV**

*Televsions are available free of charge.* In addition to regular broadcasting channels, there are free educational programs available. Follow the prompts on the TV screen to access them. On the maternity floor, there are special programs on channels 31 and 32. If you need help turning your television on, please call ext. 2044 or 718-458-2211. Chapel services are on channel 45.

**Mail and Flowers**

Our hospital staff and volunteers will deliver your mail, packages and flowers directly to your room. Please note that flowers and balloons are not allowed in the Intensive Care units.
**Home Medications**

Do not bring your medicine from home. Keep an accurate list of the medicine you take so you can give that list to your doctor.

**Clergy**

You may have a priest, rabbi, minister or someone from your faith visit you during your hospitalization. If you want to contact your spiritual adviser, please call Pastoral Care at ext. 2041.

**Hourly Rounding**

During rounding, a member of your healthcare team will check to see if your needs are met. We will ask you questions regarding pain, position and the need for bathroom assistance. This is a good time for you to ask a question or share concerns and make sure you have everything you need.

**Gift Shop and Starbucks Kiosk**

**Starbucks Kiosk** (featuring coffee, newspapers, tea, pastry, soup, sandwiches, fruit salad and other delicacies)

- Located in the cafeteria
- Monday to Friday: 8 a.m. to 8 p.m.
- Saturday and Sunday: 8 a.m. to 6 p.m.
- Holidays: 8 a.m. to 6 p.m.

**Gift Shop** (featuring gifts, magazines, flowers, candy and snacks)

- Located in the cafeteria
- Monday to Friday: 9 a.m. to 8 p.m.
- Weekends and holidays: 8 a.m. to 6 p.m.

**Free Internet**

All of our rooms are equipped with free internet access for your laptop. See page 30 for additional information.

_Network:_ BHGuest  _Password:_ bhwifi!!

**Meals**

**Jersey City Medical Center – Patient Meal Service**

All meals provided at Jersey City Medical Center have been nutritionally analyzed and approved by our team of registered dietitians (RD). Patients with consultation orders from physicians will meet one-on-one with RD.

For all other patients, the process is as follows:

- Menus for the following day are distributed by Dietary staff at the breakfast meal. Patients are encouraged to make menu selections.
- Make menu selections by circling food items listed on your patient-specific menu. Recommended menu selections include the following:
  - Entrée (hot or cold)
  - Sides
  - Dessert
  - Bread
  - Beverage
  - Condiment

**Meal Service Schedule:**

- Breakfast: 7:15 a.m. – 8:45 a.m.
- Lunch: 11:15 a.m. – 12:45 p.m.
- Dinner: 4 p.m. – 5:30 p.m.

Typical diets that your doctor may prescribe for you include:

- Regular diet (with no nutritional restrictions), which follows nutritional guidelines for caloric intake based on age, weight and height.
During Your Stay

- Cardiac diet (modified for sodium and certain types of fat content). This diet has been prescribed to improve outcomes and healthier lifestyle.
- Diabetic diet (modified for simple sugars, total carbohydrates and certain types of fat content). This diet has been prescribed to improve outcomes and healthier lifestyle.
- Renal diet (modified for sodium, potassium, phosphorous and in some cases, fluid intake).
- Modified Consistency diet (modified for patients with chewing and/or swallowing difficulties).
- Clear and Full Liquid diets generally are prescribed transitionally until able to eat solid foods.
- Culturally specific meals are available. These include kosher, halal and vegetarian. Our menu includes a variety of meal selections for all age groups.

We hope that you enjoy our meal service, and we are determined to exceed your expectations. If there is anything we can do to make your stay more accommodating, please contact the clinical nutrition manager at 201-915-3059 or director of food and nutritional services at 201-915-2169.

Vending Machines

Snacks are available in vending machines located in the Emergency Department waiting room and in the cafeteria. Healthy choice vending also is available on selected patient units.

Pharmacy

The inpatient pharmacy is open 24 hours.

RWJBarnabas Health Retail Pharmacy at Jersey City Medical Center

For your convenience, Jersey City Medical Center – RWJBarnabas Health offers an on-site retail pharmacy staffed with highly trained registered pharmacists who are dedicated to providing quality, cost-effective services to meet all of your medication needs. Located in the main lobby, the pharmacy is open to inpatients, outpatients and community members. Through our e-prescribe system, your doctor can securely transmit your prescription(s) to our pharmacy prior to you leaving the medical center, saving you a stop on the way home. For pharmacy hours or questions, call 201-915-2166.

Smoking

Smoking is not permitted anywhere in the hospital or on hospital grounds.

Fire Safety

We periodically conduct fire and disaster drills. If you hear an alarm, return to your

Where is the Hospital Cafeteria?

Our hospital cafeteria and gift shop are located on the first floor off the main lobby. Visitors are welcome to dine in the cafeteria, open Monday to Friday from 6:30 a.m. to 8 p.m. and 8 a.m. to 6:30 p.m on weekends and holidays.

Sitting area open 24 hours a day.

Food service

Monday to Friday: 6:30 a.m. to 8 p.m.
Saturday, Sunday and Holidays:
8 a.m. to 6:30 p.m.
room and follow the nurse’s instructions. **DO NOT USE THE ELEVATORS** during drills or a fire emergency (Code Red).

**Pictures and Social Media**

Pictures and video may not be taken of another person without his or her expressed written permission while on hospital property. This includes taking pictures of those being treated, other patients, visitors, those waiting for appointments and members of the hospital staff. Please contact hospital security (201-915-2045) if you have concerns about someone taking pictures or video using a camera or video recording device, including a camera phone. Posting of patients’ information on any form of social media (including websites, Facebook, Twitter and similar networks) also is not permitted and is considered a violation of patients’ confidentiality.
Speak Up!

Take charge of your care.

During your stay, your doctors, nurses and staff will treat you and your family as partners in your own care. One important way that you can be involved is to speak up. Ask questions, voice your concerns, and don’t be afraid to raise any issues relating to your care and treatment, and to overall hospital services.

In the pages that follow, you’ll find a step-by-step guide to making the most of your hospital stay—how to stay safe, get the information you need, ask the right questions and interact effectively with your doctors, nurses and hospital staff.

STAT NOTE

- Write down any questions you have
- Choose one support person to communicate with the doctors and staff if you can’t speak for yourself
- Keep a list of doctors you see and the medications they prescribe

STEP UP & SPEAK UP

SPEAK UP

Ask questions and voice concerns. It’s your body, and you have a right to know.

PAY ATTENTION

Make sure you’re getting the right treatments and medications.

EDUCATE YOURSELF

Learn about the medical tests you get and your treatment plan.

FIND AN ADVOCATE

Pick a trusted family member or friend to be your advocate or support person.

WHAT MEDS & WHY

Know what medications you take and why you take them.

CHECK BEFORE YOU GO

Use a hospital, clinic, surgery center or other type of healthcare organization that meets quality standards.

PARTICIPATE IN YOUR CARE

You are the center of the healthcare team.
Rights & Responsibilities

As a patient, you have the right to respectful and considerate care. In addition, there are specific rights and responsibilities you have during your hospital stay. More information is provided on a poster inside your room. This is a summary of the patient rights poster.

You Have the Right to:

- be informed of the hospital’s rules and regulations as they apply to your conduct.
- expect privacy and confidentiality in treatment consistent with providing you with good medical and psychiatric care.
- receive considerate, respectful care at all times and under all circumstances.
- expect prompt and reasonable responses to your questions.
- have your pain assessed and treated.
- know who is responsible for authorizing and performing your procedures or treatments.
- know the identity and professional status of your caregivers.
- know what patient support services are available, including access to an interpreter.
- have access to your medical records according to hospital policy.
- be informed of the nature of your condition, proposed treatment or procedure, risks, benefits and prognosis, and any continuing healthcare requirements after your discharge in terms you can understand.
- be informed of medical alternatives for care or treatment.
- refuse treatment, except as otherwise provided by law, and to be informed of the consequences of your refusal.
- receive access to medical treatment or accommodations regardless of race, age, gender, sexual orientation, gender identity, gender expression, national origin, religion, disability, ability to pay or sources of payment.
- know if the medical treatment prescribed for you is for experimental purposes and to give your written consent to participate if you choose.
- participate in the decision-making process related to the plan of your care.
- have access to professionals to assist you with emotional and/or spiritual care.
- participate in the discussion of ethical issues that may arise.
- express concerns regarding any of these rights in accordance with the grievance process.
- complete an advance directive—appoint a medical power of attorney to make healthcare decisions to carry out your wishes.

You Are Responsible for:

- providing accurate and complete information to your healthcare providers about your present and past medical conditions and all other matters pertaining to your health.
- reporting unexpected changes in your condition to your healthcare providers.
- informing your healthcare providers whether or not you understand the plan of care and what is expected of you.
Rights & Responsibilities

✓ following the treatment plan recommended by your healthcare providers.
✓ keeping appointments and, if you cannot, notifying the proper person.
✓ knowing the consequences of your own actions if you refuse treatment or do not follow the healthcare providers’ instructions.
✓ being considerate of the rights of other patients and hospital personnel and to follow hospital policy and regulations regarding care, conduct and safety.
✓ being considerate of others by respecting all patients’ privacy and limiting visiting hours.
✓ maintaining a quiet atmosphere.
✓ observing the hospitalwide no smoking policy.
✓ remaining out of restricted areas.
✓ refraining from calling patients after 10 p.m.
✓ refraining from providing food to patients unless otherwise ordered from a physician.

✓ being considerate of others by respecting all patients’ privacy and limiting visiting hours.
✓ maintaining a quiet atmosphere.
✓ observing the hospitalwide no smoking policy.
✓ remaining out of restricted areas.
✓ refraining from calling patients after 10 p.m.
✓ refraining from providing food to patients unless otherwise ordered from a physician.

Your Visitors Are Responsible for:
✓ complying with visiting hours as they are posted.
✓ complying with the rules and regulations of this hospital.
✓ ensuring that no children are left unattended at any time, whether in the patient room, hospital corridors or waiting areas.
✓ observing safety regulations.
✓ observing the hospitalwide no weapons policy. Any weapon will be confiscated and disposed of.

Concerns
If you have concerns about the care you or your family member received, we encourage you to speak with your physician or with the nursing supervisor. If you feel that your issue wasn't resolved, you may contact the patient advocate or you can write to the New Jersey Department of Health at:

Complaint Program
Division of Health Facilities Evaluation
CN367
Trenton, NJ 06825
or call 800-792-9770

Individuals who want to file a complaint against a DNV-accredited hospital, please contact the DNV via email at: hospitalcomplaint@dnv.com
Or mail the DNV GL Healthcare corporate office:
Attn: Hospital Complaint
DNV GL Healthcare Inc.
400 Techne Center Dr., Suite 100
Milford, OH 45150
Or you may call toll-free at 866-523-6842.
YOU’RE IN CHARGE
Errors can occur during your hospital stay. These are rare but can involve medications, procedures or paperwork—for example, being given salt with a meal when you’re on a salt-free diet, or receiving someone else’s medical forms.

You can help prevent errors by taking charge of your care. Be sure to:

■ stay informed about your medical condition
■ know the details of your treatment plan
■ understand the tests and procedures you will undergo

Your doctor can answer these questions. Take notes when you speak with your doctor, or have a trusted friend or family member take notes for you so you can refer to them later. Also ask for any written information your doctor may be able to provide about your condition and/or treatments. Remember—you’re in charge.

Stay Safe

You can contribute to healthcare safety.

While you are in the hospital, many people will enter your room, from doctors and nurses to aides and technicians. The following information will help make your hospital stay safe and comfortable.

Don’t Be Afraid to Ask…
Be sure to:

■ Ask for the ID of everyone who comes into your room.
■ Speak up if hospital staff doesn’t ask to check your ID bracelet.
■ Ask if the person has washed his or her hands before he or she touches you.
■ If you are told you need certain tests or procedures, ask why you need them, when they will happen, and how long it will be before you get the results.

Leaving your valuables at home. See page 7.
Fighting Infections

While you’re in the hospital to get well, you should know that there is the possibility of developing an infection. The single most important thing you can do to help prevent infections is to wash your hands and make sure that everyone who touches you—including your doctors and nurses—washes his or her hands, too.

You, your family, and friends should wash hands:

1. after touching objects or surfaces in the hospital room
2. before eating
3. after using the restroom

It also is important that your healthcare providers wash their hands with either soap and water or an alcohol-based hand cleaner every time, before and after they touch you. Healthcare providers know to practice hand hygiene, but sometimes they forget. You and your family should not be afraid or embarrassed to speak up and ask them to wash their hands.

Adult Diapers and Pressure Ulcers

We are an adult diaper-free organization in order to prevent skin breakdown, which can be caused by excessive skin moisture. We will continue to work with your needs to ensure your comfort. Your safety is our priority!

A pressure ulcer, sometimes called a bedsore, is when the skin and tissue below it gets hurt, usually by constant pressure. Pressure ulcers commonly form where your bones are close to your skin (ankles, elbows, back, heels and hips). They start as red areas, but can hurt skin and muscle if not treated quickly. You are at risk if you are bedridden, use a wheelchair, are unable to change your position for long periods of time, have loss of urine and/or stool control, or do not eat or drink enough.

For your safety:

- Get involved with your turning schedule by repositioning every 15 minutes
- Let staff know if you need changing
- Tell your nurse if you have pain
- Notify your nurse of any red or sensitive areas you notice, as soon as possible

Your nurse will:

- Check your skin at least daily
- Limit pressure to high-risk areas by repositioning
- Keep your skin free of moisture
- Assess your need for a special mattress covering

Preventing Medication Errors

By taking part in your own care, you can help the members of your healthcare team avoid medication errors. Here’s how:

Be sure that all of your doctors know what medications you have been taking, including prescription drugs, over-the-counter medications, herbal and vitamin supplements, natural remedies and recreational drugs.

Be sure that all of your doctors know of any allergies you may have—to medications, anesthesia, foods, latex products, etc. When you are brought medications or IV fluids, ask the person to check to be sure you are the patient who is supposed to receive the medications. Show that person your ID bracelet to double-check. Remember—you play an important role in helping to reduce medication errors.
DVT: LOWER YOUR RISK

Deep-vein thrombosis (DVT) occurs when blood clots form in the legs and block circulation. The clots can lodge in the brain, heart or lungs, causing damage or even death. When you’re hospitalized and in bed with limited physical activity, your risk of DVT increases.

Ask your doctor about using compression boots or stockings and/or blood thinners to prevent DVT during your stay.

Tell your doctor or nurse if you have any of the following warning signs:

- A leg cramp or charley horse that gets worse
- Swelling and discoloration in your leg, upper arm or neck
- Unexplained shortness of breath
- Chest discomfort that gets worse when you breathe deeply or cough
- Lightheadedness or blacking out

Patients often fall because they are on medications that make them dizzy, they are weak and unsteady due to illness or medical procedures, or they’ve been sitting or lying down for too long.

For your safety, please:

- Always call for assistance before getting out of bed.
- Wear properly fitting shoes with nonskid soles.
- Keep the call button within easy reach.
- Have necessary items within reach, such as your glasses, tissues, the telephone and anything else you need.
- When you get assistance, rise slowly from your bed or chair to prevent dizziness.
- Walk close to the wall and hold onto the handrail while in the bathroom.

Know Your Meds

While you are hospitalized, your doctor may prescribe medications for you. Be sure that you understand exactly what they are and why they are being prescribed. Use this checklist to help you get the information you need from your doctor:

- What is the name of the medicine?
- What is its generic name?
- Why am I taking this medicine?
- What dose will I be taking?
- How often, and for how long?
- What are the possible side effects?
- Can I take this medicine while taking my other medications or dietary supplements?
- Are there any foods, drinks or activities that I should avoid while taking this medicine?

KEEP A WALLET-SIZED NOTEBOOK OF ALL MEDICATIONS YOU ARE TAKING.

Preventing Falls

Patients often fall because they are on medications that make them dizzy, they are weak and unsteady due to illness or medical procedures, or they’ve been sitting or lying down for too long.

For your safety, please:

- Always call for assistance before getting out of bed.
- Wear properly fitting shoes with nonskid soles.
- Keep the call button within easy reach.
- Have necessary items within reach, such as your glasses, tissues, the telephone and anything else you need.
- When you get assistance, rise slowly from your bed or chair to prevent dizziness.
- Walk close to the wall and hold onto the handrail while in the bathroom.
What is a MDRO?
Multidrug-Resistant Organisms (MDROs) can cause infections that are difficult to treat. An MDRO is a germ that has become resistant to one or more classes of antibiotics. This means that infections caused by an MDRO are harder to treat with antibiotics. MDROs are becoming more common, but there are ways to prevent these germs from spreading and ways to prevent new drug-resistant germs from emerging.

To help prevent infections:

Get Vaccinated. RWJBarnabas Health employees are offered a number of vaccines to prevent illness, which keeps our staff healthy and lowers the risk of spreading infections to you. Vaccines also are available to you and are encouraged. Speak to your doctor or nurse should you have any questions about vaccines.

Contain Germs. If you are found to carry a germ that could cause infections in other patients, visitors and staff, we will place you on certain precautions in a private room to prevent the spread of germs to others. Staff and visitors will wear protective equipment such as gowns, gloves and/or masks to prevent spreading germs to others in the hospital.

Check tubes and drains. Urinary catheters, IVs and other tubes and drains are sometimes needed for your care, but they also can provide a route for germs to enter your body. While in the hospital, our staff will assess and care for them routinely to help prevent infections, and will remove when no longer needed for your care.

After Prevention Comes Treatment
It is not always needed to treat an infection with an antibiotic; sometimes a wound can be cleaned out and it will heal without any need for antibiotic therapy. If you have an infection that needs to be treated with antibiotics, our laboratory can use the samples taken from blood, urine, stool and wounds to assess which antibiotics are the best for treatment.
What Are Your Advance Directives?

What Are Advance Directives?
An advance directive is a document that allows you to direct who will make healthcare decisions for you and to state your wishes for medical treatment if you become unable to decide for yourself. Your advance directive may be used to accept or refuse any procedure or treatment, including life-sustaining treatment. You do not need a lawyer to complete advance directives.

Advance Directives

- You have the right to make decisions about your own medical treatment. These decisions become more difficult if, due to illness or a change in mental condition, you are unable to tell your doctor and loved ones what kind of healthcare treatments you want. That is why it is important for you to make your wishes known in advance. Contact a patient advocate for assistance.

  If you did not bring your advance directive with you to the hospital, please have your family or trusted friend bring it to the hospital for your record.

  Here is a brief description of each kind of directive:

Living Will
A set of instructions documenting your wishes about life-prolonging medical care. It is used if you become terminally ill, incapacitated or unable to communicate or make decisions. A living will protects your rights to accept or refuse medical care and removes the burden of making decisions from your family, friends and medical professionals.

Healthcare Proxy
A person (agent) you appoint to make your medical decisions if you are unable to do so. Choose someone you know well and trust to carry out your wishes. Be sure to discuss this with the person before naming him or her as your agent. Remember that an agent may have to use his or her judgment in the event of a medical decision for which your wishes aren't known. A healthcare proxy is especially important if you have no close family or your most trusted friend or companion is not your next-of-kin.

Bioethics Consultation Service
You have the right to contact our Ethics Committee on any ethical concern during your hospital stay. The Ethics Committee may help when you or your family is uncertain or confused about what course of action to take—such as what should family members do when they disagree about what is best for the patient; when should life-prolonging treatments be started, continued or stopped. You may contact the Ethics Committee through the patient advocate or palliative care nurse practitioner. There is no fee for these services.

Palliative Care Program
We have a Palliative Care Program run by a board-certified geriatrician and palliative care nurse practitioner. You have the right to ask your physician to contact our team so it can provide you and your family with the information and guidance your need to explore your options for palliative care.
Your Privacy & Information

Privacy & Your Health Information

You have privacy rights under a federal law that protect your health information. These rights are important for you to know. Federal law sets rules and limits on who can look at and receive your health information.

Who must follow this law?

- Doctors, nurses, pharmacies, hospitals, clinics, nursing homes and many other healthcare providers and their vendors
- Health insurance companies, HMOs and most employer group health plans
- Certain government programs that pay for healthcare, such as Medicare and Medicaid

What information is protected?

- Information your doctors, nurses and other healthcare providers put in your medical records
- Conversations your doctor has with nurses and others regarding your care or treatment
- Information about you in your health insurer’s computer system
- Billing information about you at your clinic
- Most other health information about you held by those who must follow this law

You have rights over your health information

Providers and health insurers who are required to follow this law must comply with your right to:

- File a complaint

To make sure that your health information is protected in a way that doesn’t interfere with your healthcare, your information can be used and shared:

- For your treatment and care coordination
- To pay doctors and hospitals for your healthcare and help run their businesses
- With your family, relatives, friends or others you identify who are involved with your healthcare or your healthcare bills, unless you object
- To make sure doctors give good care and nursing homes are clean and safe
- To protect the public’s health, such as by reporting when the flu is in your area
- To make required reports to the police, such as reporting gunshot wounds

Without your written permission, your provider cannot:

- Give your health information to your employer
- Use or share your health information for marketing or advertising purposes
- Share private notes about your mental health counseling sessions

Adapted from U.S. Department of Health & Human Services Office for Civil Rights
Dear Sam,

I thought we were in this together, but apparently I was wrong. You’ve been ignoring me for a while. We don’t go for walks as often as we used to. You barely eat anything green anymore. And you don’t realize the daily pressure you put me under. It’s just too much.

I QUIT!

Sincerely,

Your Heart

Don’t let your heart quit on you. If you are living with high blood pressure, just knowing and doing the minimum isn’t enough.

Uncontrolled high blood pressure could lead to stroke, heart attack or death. Get yours to a healthy range before it’s too late.

Find out how at heart.org/BloodPressure

Right to Obtain Your Medical Record

- Written authorization and positive identification is required
- Requests for medical records will be answered promptly
- There is a reasonable cost-based fee for copying medical records, which is based on New Jersey Department of Health recommendations
- If you feel that there is inaccurate information in your record, you can add an addendum

Your Information

If you believe your health information was used or shared in a way that is not allowed under the privacy law, or if you weren’t able to exercise your rights, you can file a complaint with your provider or health insurer. You also can file a complaint with the U.S. government. Go online to https://ocrportal.hhs.gov/ocr/smartscreen/main.jsf for more information.

A separate law provides additional privacy protections to patients of alcohol and drug treatment programs. For more information, go online to www.samhsa.gov.

How do I get copies of my medical records?

To obtain a copy of your medical records, call the Medical Records Department at 201-915-2152.
Do You Have Pain?

Pain Management

- You are the expert about how you are feeling. Be sure to tell your doctor or nurse when you have any kind of pain.
  To help describe your pain, be sure to report:
  - When the pain began.
  - Where you feel pain.
  - How the pain feels—sharp, dull, throbbing, burning, tingling.
  - If the pain is constant, or if it comes and goes.
  - What, if anything, makes the pain feel better.
  - What, if anything, makes the pain feel worse.
  - How much, if any, pain your medicine is taking away.
  - If your medicine helps with the pain, how many hours of relief do you get?

USE THE PAIN RATING SCALE BELOW TO TELL YOUR DOCTOR OR NURSE HOW YOUR PAIN IS AFFECTING YOU.
Don’t Leave Until…

6 things to know before you walk out that hospital door.

When it’s time to be released from The Jersey City Medical Center, your physician will authorize a hospital discharge. This doesn’t necessarily mean that you are completely well—it only means that you no longer need hospital services. If you disagree, you or your caregiver may appeal the decision.

On the other hand, you may be pleased to learn that your doctor has approved your discharge. But before leaving the hospital, there are several things that you or your caregiver must attend to.

The first step is to know who will be involved in your discharge process. This will always be your doctor and nurse, but may involve a social worker or case manager, if your needs are more complex. You and your caregiver should meet this person relatively early in your hospital stay or well before your expected discharge date.

If You Disagree
You may appeal your doctor’s discharge decision. If you are a Medicare patient, be sure you are given “An Important Message from Medicare.” This details your rights to remain in the hospital for care and provides information on who to contact to appeal a discharge decision.

Also see Preparing for Discharge on page 26
Don’t Leave Until... continued

Make sure you have the following information before you leave the hospital:

1. Discharge summary. This is an overview of why you were in the hospital, which healthcare professionals saw you, what procedures were done, and what medications were prescribed.

2. Medications list. This is a listing of what medications you are taking, why, in what dosage, and who prescribed them. Also having a list prepared by the hospital is a good way to double-check the information.

3. Rx. A prescription(s) for any medications you need.

4. Follow-up care instructions. Make sure you have paperwork that tells you:
   - what, if any, dietary restrictions you need to follow and for how long
   - what kinds of activities you can and can’t do, and for how long
   - how to properly care for any injury or incisions you may have
   - what follow-up tests you may need and when you need to schedule them
   - what medicines you must take, why, and for how long
   - when you need to see your physician
   - any other home-care instructions for your caregiver, such as how to get you in and out of bed, how to use and monitor any equipment, and what signs and symptoms to watch out for

If you think you need help after discharge, be sure to tell your nurse to request Case Management Services at no cost to you.

- telephone numbers to call if you or your caregiver has any questions pertaining to your after-hospital care

5. Other services. When you leave the hospital, you may need to spend time in a rehabilitation facility, nursing home or other institution. Or you may need to schedule tests at an outpatient setting. Be sure to speak with your nurse or physician to get all the details you need before you leave.

6. Community resources. You and your caregiver may feel unprepared for what will happen after your discharge. Make sure your discharge planner provides you with information about local resources, such as agencies that can provide services like transportation, equipment, home care and respite care, and agencies that can help with patient care and respite care.
**Home Healthcare**
Part-time healthcare provided by medical professionals in a patient’s home to maintain or restore health. It includes a range of skilled and non-skilled services, including part-time nursing care, therapy, and assistance with daily activities and homemaker services, such as bathing and meal preparation. Medicare defines home healthcare as intermittent, physician-ordered medical services or treatment.

**Durable Medical Equipment (DME)**
Medical equipment that is ordered by a doctor for use in a patient’s home. Examples are walkers, crutches, wheelchairs and special hospital type beds for home. DME is sometimes paid for under Medicare Part B and Part A for home health services. Please contact your case manager for additional information.

**Assisted Living**
An apartment in a long-term care facility for elderly or disabled people who can no longer live on their own but who don’t need a high level of care. Assisted living facilities provide assistance with medications, meals in a cafeteria or restaurant-like setting, and housekeeping services. Nursing staff is on-site. Most facilities have social activities and provide transportation to doctor’s appointments, shopping, etc.

**Acute Rehabilitation**
A short-term stay providing intensive, physical, occupational and speech therapies, post-injury or -surgery, or to regain the highest level of functioning possible.

**Nursing Home/Short-Term Rehab**
A residential facility for people with chronic illness or disability, particularly elderly people who need assistance for most or all of their daily living activities such as bathing, dressing and toileting. Nursing homes provide 24-hour skilled care, and also are called convalescent homes or long-term care facilities. Many nursing homes also provide short-term rehabilitative stays for patients recovering from an injury or illness. Some facilities also have a separate unit for residents with Alzheimer’s disease or memory loss.

**Hospice**
A licensed or certified program that provides care for people who are terminally ill and their families. Hospice care can be provided at home, in a hospice or other freestanding facility, or within a hospital. Hospice care emphasizes the management of pain and discomfort and addresses the physical, spiritual, emotional, psychological, financial and legal needs of the patient and his or her family.
Preparing for Discharge

When You Are Discharged
Your physician determines when you are ready to be discharged. Your physician and nurse will give you discharge instructions and answer any questions you have about managing your treatment and medications once you are home. If you are confused or unsure about what you need to do, what medications you must take, or if you have to restrict your diet or activities, don’t be afraid to ask and take notes.

Be sure you understand any instructions you have been given before you leave the hospital.

Going Home
- When your doctor feels that you are ready to leave the hospital, he or she will authorize a hospital discharge. Please speak with your nurse about our discharge procedures.
- Here are a few tips to make the discharge process run smoothly:
  - If you think you need help after discharge, be sure to tell your nurse to request Case Management Services at no cost to you.
  - Verify your discharge date and time with your nurse or doctor.
  - Have someone available to pick you up.
  - Check your room, bathroom and bedside table carefully for any personal items.
  - Make sure you or your caregiver has all necessary paperwork for billing, referrals, prescriptions, etc.
  - Remember to take all your personal items home.

What a Hospital Bill Covers
The hospital bill covers the cost of your room, meals, 24-hour nursing care, laboratory work, medication, therapy and the services of hospital employees. You will receive a separate bill from your physicians, ambulance and testing for their professional services.

The hospital is responsible for submitting bills to your insurance company, and you must provide the hospital with information to expedite your claim. You also should remember that your policy is a contract between you and your insurance company, and you have the final responsibility for payment of your hospital bill. You may be asked to sign an assignment form so the hospital can send bills to your insurance company.

Coordination of Benefits (COB)
Coordination of Benefits, referred to as COB, is a term used by insurance companies when you are covered under two or more insurance policies. This usually happens when spouses or partners are listed on each other’s insurance policies, both parents carry their children on their
individual policies, or there is eligibility under two federal programs. This also can occur when you are involved in a motor vehicle accident and have medical insurance and automobile insurance.

Most insurance companies have COB provisions that determine who is the primary payer when medical expenses are incurred. This prevents duplicate payments. COB priority must be identified at admission in order to comply with insurance guidelines. Your insurance may request a completed COB form before paying a claim, and every attempt will be made to notify you if this occurs. The hospital cannot provide this information to your insurance company. You must resolve this issue with your insurance carrier in order for the claim to be paid.

**Medicare**

This hospital is an approved Medicare provider. All services billed to Medicare follow federal guidelines and procedures. Medicare has a COB clause. At the time of service, you will be asked to answer questions to help determine the primary insurance carrier paying for your visit. This is referred to as an MSP Questionnaire and is required by federal law. Your assistance in providing accurate information will allow us to bill the correct insurance company.

Medicare deductibles and coinsurance are covered by your secondary insurance. If you do not have secondary insurance, you will be asked to pay these amounts or establish a payment plan. If you are unable to pay these amounts, we will help you determine if you qualify for a state-funded program.

**Commercial Insurance**

As a service to our customers, we will forward a claim to your commercial insurance carrier based on the information you provide at the time of registration. It is very important for you to provide all related information such as policy number, group number and the correct mailing address for your insurance company.

---

**Uninsured?**

If you have no insurance coverage, Jersey City Medical Center – RWJBarnabas Health financial counselors can inform you of programs for which you qualify. Call 201-204-1080.

Jersey City Medical Center offers financial assistance and reduced-charge financial assistance, which is available only for medically necessary care. An application for determining eligibility may be obtained through the Business Office by calling 877-221-7809.

Jersey City Medical Center will make a written determination of eligibility for assistance within 10 working days from the time of submission of the completed application with all required documentation.

Jersey City Medical Center is required by state law to provide these services to qualifying patients. A patient has up to one year from the date the service is provided to apply for financial assistance and reduced-charge financial assistance.
Preventing Discharge

Saying Thank You
We are grateful you chose JCMC and hope you use our services to support your recovery and healthcare needs in the future. Our patients often thank us with a smile, warm handshake or even a hug. Many send letters of appreciation or make gifts in honor of staff members who cared for them. Your support ensures that you, your family and your neighbors continue to receive world-class, compassionate care from our expert team.

How You Can Help
Personal notes about your experience mean a great deal to our staff. We also love to feature patients in print and online, so please consider granting us permission to share your story publicly. If you would like to make a tax-deductible donation to honor a specific caregiver or an entire healthcare team that cared for you, please call 201-377-6057 or visit www.JCMedicalCenterGiving.org for more information.

For Self-Pay Patients
If you anticipate difficulties in meeting your portion of expenses, please contact our Business Office at 877-221-7809 as early as possible to make credit arrangements. The hospital accepts cash, checks, Discover, MasterCard and Visa.

Rx 4 NJ
If you need help with paying for prescription medicines, you may be eligible for discounted or even free medicines. Call 888-793-6765 (888-RX-FOR-NJ) or log on at: https://nj.pparx.org/gethelp. You will be asked a few short questions to determine your eligibility, then shown the programs and discounts for which you qualify.

Stroke
ACT FAST (Face, Arm, Speech and Time)
Jersey City Medical Center is a state-designated Primary Stroke Center and is the proud recipient of the American Heart/American Stroke Association Get With The Guidelines® Stroke Gold Plus Quality Achievement Award for the fourth consecutive year. If you notice any of these signs in a patient or visitor, immediately notify a member of our staff and dial 8. If you’re outside of the hospital, dial 911 or your emergency medical services. Get to a hospital right away!

- Sudden numbness or weakness of the face, arm or leg, especially on one side of the body
- Sudden confusion, trouble speaking or understanding
- Sudden trouble seeing in one or both eyes
- Sudden trouble walking, dizziness, loss of balance or coordination
- Sudden, severe headache with no known cause

If you would like to speak with our stroke program coordinator, please dial 201-915-2000, ext. 3519, and ask for the stroke coordinator.
Continuum of Care Call Center

The discharge process can be an overwhelming experience. Here at Jersey City Medical Center, the Continuum of Care Call Center will help you to transition home safely by providing the necessary information to assist you in managing your health after discharge. Our vision is to empower patients and their families to become our partners in managing their health after discharge while promoting lifestyle changes.

After you are discharged home, you may be receiving a call from one of our nurse care advisors within 72 hours. During the call, we will help you and your caregiver understand and follow discharge instructions, review medications prescribed, discuss disease-specific early warning signs using self-management zones and ensure that you are healthier. Other benefits of working with a nurse care advisor are:

- Medication information
- Follow-up appointment scheduling assistance
- Educational group sessions/health fair information
- Personalized health management tools

“Self-Management Zones”

The Self-Management Zones are available for diabetes, heart attack, open heart surgery, chronic obstructive pulmonary disease, pneumonia, heart failure and falls. If you would like a copy of one of these zones, please ask your primary nurse.

Jersey City Medical Center cares about your health, in and out of the hospital. Our nurse care advisors aim to make your transition home seamless, with the ultimate goal of continued health. “Life is better healthy” and the Continuum of Care Call Center are working to help you stay healthy once you are back home. For more information, please contact 201-915-2610.

Welcome to Emmi Solutions!

Here at Jersey City Medical Center, we want our patients to be empowered and take control of their healthcare. Our job is to provide you with the tools and information to do just that. During your stay here, your nurse will assign a personalized computer-based interactive education program. You will be able to watch it here at the medical center and after discharge.

In addition, you will get a special access code so not only can you watch the program here during your hospital stay, but you can watch it at home, or send the link to family and friends who you would like to be involved in your care.

What is Emmi®?

Emmi® is a web-based program that takes complex medical information and makes it simple and easy to understand. Using a soothing female voice and animation, you can watch an Emmi program to help you prepare for your upcoming procedure or manage your chronic condition.

Emmi® programs answer frequently asked questions, and you can view the program in the comfort of your own home or anywhere that has internet access. During your hospital stay, your nurse can assign you an Emmi® module.
that goes over your procedure, your condition, your stay in the hospital and your discharge.

Laptops are available on every unit and will be brought to you so that you can watch your Emmi® module at the bedside. Each Emmi® program takes about 20 minutes to watch. You can view them as many times as you like. As you watch the program, you also can write notes and questions that you can print out at the end.

Instructions for Wireless Internet Access at Jersey City Medical Center

Access is available for those with currently supported versions of Windows and Apple operating systems and can be used at most locations throughout the hospital. The Jersey City Medical Center Information Systems Department has put together the following instructions to help visitors log on to the public wireless internet. *Note: Devices purchased before 2003 may not be supported by the JCMC wireless and may have some difficulty connecting.

Windows Laptop
1. Left click once on your Wireless Network icon usually located at the bottom righthand corner of your screen.
2. You now will see a list of wireless network connections. Select the network BHGuest and click connect.
3. You will see the connected indicator next to BHGuest.
4. When prompted, enter the password: bhwifi!!
5. Open your internet browser and click enter.
6. You are now on the Jersey City Medical Center website.

Antibiotic Resistance

Antibiotic resistance is the ability of bacteria to resist the effects of an antibiotic. Antibiotic resistance can cause illnesses that were once easily treatable with antibiotics to become dangerous infections that are difficult to kill, expensive to treat and in some cases, can lead to serious disability or even death. Every time a person takes antibiotics, sensitive bacteria (bacteria that antibiotics still can attack) are killed, but resistant bacteria are left to grow and multiply. Antibiotics are not effective against viral infections like the common cold, flu, and most sore throats. Widespread use of antibiotics for these illnesses is an example of how overuse of antibiotics can promote the spread of antibiotic resistance. Smart use of antibiotics is key to controlling the spread of resistance.

Here is what you can do to help prevent antibiotic resistance:

- Take the prescribed antibiotic exactly as your healthcare professional tells you.
- Never take an antibiotic for a viral infection like a cold or the flu.
- Never pressure your healthcare professional to prescribe an antibiotic.

Our Antimicrobial Stewardship Program at Jersey City Medical Center, led by an infectious disease physician and an antimicrobial stewardship pharmacist, strives to help prevent resistance by providing education to our staff and establishing policies that support appropriate antibiotic use. Our goal is to ensure that all our patients only receive antibiotics when they need them and always the right antibiotic, at the right dose, for the right duration. For more information, visit www.cdc.gov/getsmart/community/index.html.
Patient Navigation Program

What is The Patient Navigation Program?

The Patient Navigation Program is an innovative community-based program that helps people navigate the complex healthcare system.

The Patient Navigation Program helps eliminate barriers by providing patients with the skills and resources needed to manage their healthcare condition. We empower patients to TAKE CONTROL of their health.

RWJBarnabas HEALTH
Let's be healthy together.

www.rwjbh.org/jerseycity 201-915-2000 : 31
For the Caregiver

Your role as a patient advocate.

While your loved one is in the hospital, who will speak up for him or her? You can, by being the patient’s advocate—the person who will help the patient work with doctors, nurses and hospital staff. To help your loved one make the best decisions about his or her care and treatment, follow the advice in the caregiver list at right.

While you are making sure that your loved one’s needs are being met, don’t neglect your own. Caregiving is a stressful and time-consuming job. You may neglect your diet, your normal exercise routine and your sleep needs. You may find that you have little or no time to spend with friends, relax or just be by yourself for a while. But downtime is important. Don’t be reluctant to ask for help in caring for your loved one. Take advantage of friends’ offers to help, and look into local adult daycare programs.

Jersey City Medical Center’s Patient Navigation Program offers additional support to the caregivers. This is a home program for caregivers of family members with multiple chronic diseases. It includes survey tools to identify caregiver strain, as well as barriers to good outcomes (i.e. fall potential, hearing and vision problems, cognitive and toileting concerns) and attaches next steps/solutions to identified barriers. Caretakers also earn reward points for their participation.

For more information about this service, please call 201-388-1290 or visit us online at www.rwjbh.org/jerseycity.

Find out more about how you can ease the stress of caregiving at www.caregiver.org.

CAREGIVER...
know what condition your loved one is being treated for.

patient’s rights
Know your patient’s rights and responsibilities (see Rights and Responsibilities on page 13).

advance directives
Know whether or not your loved one has an advance directive and if so, what it specifies (see What Are Your Advance Directives on page 19).

ask questions
If your loved one is too ill or reluctant to ask questions, make note of his or her concerns and any you may have, and don’t be afraid to speak up (see Speak Up! on page 12).

what’s next?
Will your loved one need home care or care at another facility? Ask to speak with a case manager to find out what your options are (see Preparing for Discharge on page 26).
Helping Us Help Others

The Jersey City Medical Center Foundation raises philanthropic funds to support the hospital. Donor contributions help pay for capital equipment, community health services, special projects and much more to enhance our quality of care.

For more than 130 years, Jersey City Medical Center has proudly served this community and is the only not-for-profit hospital in Jersey City. With your help, we will continue to provide world-class, compassionate care and achieve even more for our patients.

Please consider making a gift to honor a loved one, thank a healthcare provider, advance a specific project or support our general operations. Donations to the hospital are fully tax deductible and used exclusively for the programs and services at Jersey City Medical Center.

To learn more, contact the Jersey City Medical Center Foundation at 201-377-6057 or visit www.JCMedicalCenterGiving.org.

Organ and Tissue Donation

Organ transplants save thousands of lives each year. However, many people do not properly declare their wishes to donate. NJ Sharing Network has established The New Jersey Organ and Tissue Donor Registry to help make families aware of their loved ones’ wishes. Because family consent is required for a donation, here are some ways to share your decision with your family:

- Tell your family that you want to be a donor.
- Ask your family to sign your donor card as a witness. If you have already signed a card, show it to them and indicate your decision on your driver’s license.
- If you are renewing your driver’s license or are getting your license for the first time, be sure to tell the agent at your local MVA that you wish to have the organ donor designation on your license.
- Join the New Jersey Organ and Tissue Donor Registry online.

Volunteer

Jersey City Medical Center volunteers provide a variety of personal services. You will meet them on the patient floors and in the gift shop. They escort incoming patients to their rooms, deliver mail and packages, fill water pitchers and much more. If you would like to join our volunteer team, please contact the Office of Volunteer Services at: 201-309-2739.

JCMC Auxiliary

The Jersey City Medical Center Auxiliary is a community ambassador corps of dynamic men and women who work on special projects to benefit Jersey City Medical Center, its patients and their families. The JCMC Auxiliary was active in restoring the Rose Garden near the hospital’s main entrance and has raised funds to support programs and services at the medical center. If you are interested in becoming a member of the Auxiliary, please call the Jersey City Medical Center Foundation office at 201-377-6057 for more information.
Staff Definitions

Nurses Ext. 2300
In each nursing unit, a registered nurse is responsible for supervising patient care and directing the nursing and support staff of the unit. Registered nurses are assisted by nursing assistants and nurse patient care technicians. The nursing staff is available around the clock.

Patient Advocate Ext. 2041
Your comfort and well-being is our first concern. Our patient advocate is here to assist you and your family in the following ways:
- Answer questions about hospital and patient rights and policies
- Act as liaison among hospital staff, administration and you
- Address any complaint or grievances you may have
- Provide assistance on any ethical concerns or questions you may have
- Listen to your suggestions and compliments about hospital staff and services

Dietitians Ext. 3917
A registered dietitian will review your medical record and work with your healthcare team to develop a nutrition care plan for you. Registered dietitians also are available to educate you about any diets you may need to follow after you are discharged.

Rehabilitation Therapists Ext. 2943
Physical therapists, occupational therapists, speech pathologists and audiologists will work with you, your family and your medical team to help meet goals of recovery. Therapy may range from brief consultation to long-term intervention, based on the extent of your injuries or illness. To schedule an appointment for Pulmonary Function Test, please call 201-915-2560.

Outpatient Rehab 201-915-2410
We provide outpatient physical therapy, occupational therapy, speech therapy and audiology services to patients of all ages. Please call to schedule an appointment.

Respiratory Care Service 201-915-2560
We provide Outpatient Pulmonary Function Tests on Tuesdays. To schedule an Outpatient Pulmonary Function Test, please call 201-915-2560.

Technicians and Technologists Ext. 4157
Skilled health professionals perform and assist with laboratory and other procedures, including X-rays, mammograms, ultrasound, CT scans, MRIs, cardiac catheterization, radiation therapy and other procedures that help in diagnosing and treating your illness or injury.

Case Managers/Social Workers Ext. 2070
Case managers will review your medical record and discuss your discharge planning. They also are available to assist you with arrangement for home care, admission to a long-term care facility, rehabilitation care, counseling and other community resources.

Pharmacists Ext. 2060
While you are in the hospital, all of your medications are dispensed by our hospital pharmacists. They can answer any questions you have regarding your medications.
Volunteers 201-309-2739
Volunteers give thousands of hours each year to our hospital to enhance the care of our patients and their families. They provide support throughout the hospital, including delivering mail and flowers, operating the gift shop and escorting patients.

Jersey City Medical Center Crisis and Mental Center Hotline
866-367-6023

Support groups for recently discharged patients and members of the community.

RWJBarnabas Health In-House Pharmacy
We now offer a RWJBarnabas Health in-house pharmacy located in our main lobby. This pharmacy is operated to help you fill your prescriptions prior to discharge. You can reach it directly by calling 201-915-2166.

Breast Cancer Survivor Group
Call 201-309-2725 for more information.

Diabetes Support Group
The community diabetes support group at Jersey City Medical Center is held for those who are living with diabetes or caring for a loved one with diabetes, using the Conversation Map® tool developed by the American Diabetes Association. Register at 888-724-7123.

Healing Hearts and Connecting Hands
Support group for cardiac patients and those who have had interventional cardiac procedures and well as their caregivers. Fourth Monday of each month (except May, third Monday) 6:30 p.m. to 8:30 p.m. Contact: Susan Weiss, RN MS 201-384-2751 or 201-739-9292.

NAMI Hudson County Peer and Family Support Group
NAMI (the Nation’s Voice on Mental Illness) is a nonprofit health organization. Nation’s Voice on Mental Illness. Its mission is to provide support, education and advocacy to help improve the quality of life of individuals suffering with mental illness and their families.

Anyone is welcome to join our monthly peer and family support group meetings. You can come to listen, be heard and share ideas. Meet others who also are working on their recovery and participate in social activities.

For more information, contact Martha Silva at 201-861-0614 or namihudson@msn.com.

Patient & Family Support Group
Monthly support groups that offer informative discussion and empowerment to help people cope with challenges associated with managing chronic health conditions.

Contact: Raushanah Ali, 201-984-1598 or 201-424-4521

Got Asthma?
Monthly support group is designed for those families affected by asthma. The group is hosted by our asthma educators and is open to children and adults in the community. Blood pressures, raffles and education is offered (bilingual educators – English & Spanish).

Registration Required
For more information, call 201-424-3226 or 201-388-1290.
Know Your Medications
A support group to help empower patients with the knowledge and information on the medications they are taking for multiple chronic conditions.

Learn from medical experts about the safety and side effects presented by certain medications.

Contact: Candice Pimentel, 201-984-1591 or 201-424-3226

Caring for the Caregiver
Bi-monthly support group
The Caregiver Support group was created to provide an added support system; providing emotional support, healthy tips and to exchange coping skills. Open to all caregivers. For more information, call Kimberly Dawson, 201-984-1297 or 201-388-6000.

Cancer Support Group
The Oncology Department at JCMC offers a cancer support group. The group is open to all Hudson community residents and will be facilitated by JCMC oncology nurse navigator. For more information, call 201-915-2073.
Voice of the Customer

Jersey City Medical Center and RWJBarnabas Health value and review suggestions from members of the communities we serve. We invite our patients and their families also to become engaged in the decision-making process of our hospital. We call this the “Voice of the Customer.” You can be a “Voice of the Customer” by participating as a member of one of our key process councils and/or committees. These committees are composed of patients, concerned community members, staff and physicians. The medical center is a not-for-profit organization governed by volunteers who serve in a number of capacities.

If you are interested in serving on a committee or want to make a suggestion, please contact:

The DAISY Award for Extraordinary Nurses at Jersey City Medical Center

**The DAISY Award** was established by the DAISY Foundation in memory of J. Patrick Barnes who died at 33 of ITP, an autoimmune disease. The Barnes family was awestruck by the clinical skills, caring and compassion of the nurses who cared for Patrick, so they created this national award to say thank you to nurses everywhere.

Look for nomination forms on main website and next to drop-off boxes located on each lobby. The Daisy Award will be presented every month.
My Medications

*Keep track of all medications you are prescribed while in the hospital.*

When you get home, add all other medications—including over-the-counter, vitamins and herbs—to this list. Update your list as needed.

Having cancer is hard. Finding help shouldn’t be.

The American Cancer Society is here for you when you need us, where you need us.

cancer.org  |  1.800.227.2345
Freedom from pain starts here.

Shoulder
Whether from a new sports injury or lingering arthritis, pain is often eliminated without surgery, and with advanced arthroplasty in more severe cases.

Hand
From stiff joints to nerve issues, minimally invasive microsurgery restores function to your hand, with less pain and quicker recoveries.

Back
The best possible diagnosis from fellowship-trained spinal experts means a solution to your back pain that’s right for you.

Ankle
Minimally invasive ankle repair is the long-term solution for everything from tendonitis to bone-on-bone pain.

Elbow
Solutions for elbow pain range from non-invasive physical therapy to prolotherapy to the most advanced surgical treatments available.

Hip
Get back to what you love with the help of board-certified orthopedic surgeons who bring freedom from pain within reach.

Knee
Recover in less time, with less pain, thanks to minimally invasive partial and total knee replacements by board-certified orthopedic surgeons.

Learn more about these and other solutions offered by The Orthopedic Institute at Jersey City Medical Center at rwjbh.org/ortho or call 1.844.63.ORTHO
