

Family Planning Services at Monmouth Medical Center

Helping Women and Teens Maintain a Healthy Reproductive Life

Family planning helps women plan the number and spacing of pregnancies, prevent unintended pregnancies or achieve a pregnancy. The Family Planning Clinic at Monmouth Medical Center provides access to affordable reproductive health care, including all contraceptive methods. Our high quality services are provided by obstetrician/gynecologists, nurse midwives, and nurses and include screenings and testing, as well as access to emergency contraception.

Our mission is to provide women and teens with easy access to convenient, confidential family planning services. The clinic is located just off the main lobby in the hospital's Cranmer Ambulatory Surgery Center and is next door to the consumer pharmacy where prescriptions can be filled following the visit.

Family planning services include:

- All birth control methods, including birth control pills, condoms, IUD's and implants
- Sexually transmitted infection screening and treatment
- Emergency contraception – Plan B (morning after pill)
- Referrals to specialized doctors as needed
- Referrals to local community organizations as needed
- Pregnancy tests, counseling and referrals
- Health promotion and education on sexual health

All insurances are accepted. For those without insurance, services are available at no or low cost, based on income.

Hours are available every Tuesday, Wednesday and Friday. We can help you learn more about the benefits of family planning. Make your appointment today.
