Surgery, Same Day Surgery and Outpatient Procedures:

Ready to see you.

It’s safe for you to come back: Don’t delay your health care

Your personal protection is our #1 priority.

Evidence-Based Infection Prevention Techniques

Monmouth Medical Center (MMC) offers the most advanced electrostatic disinfecting technology to protect patients and staff from COVID-19. The revolutionary cleaning system uses an innovative electrostatic sprayer, providing a germicidal mist that wraps around the entire object, providing 100 percent sanitizing coverage. It enables superior coverage of trusted disinfecting solutions in hard-to-reach places — including the side, underside and backside of surfaces and sanitization of soft surfaces. Additionally, the hospital uses ATP Swab Testing to demonstrate effectiveness of cleaning protocols in eliminating the virus on environmental surfaces.

Emotional Support To Ease Your Fears About Having A Procedure

MMC’s team is here to answer your questions and provide you with the support you need to calm any anxiety that you may have and allow you to focus on your preparation and speedy recovery.

Before your surgery

Individualized Pre-Admission Preparation

Our Perioperative team will customize your preadmission testing to include a COVID-19 screening test if indicated.

Getting You Ready To Recover Faster

Our providers work closely with you to ensure that your pre-surgery preparation places you in the best condition possible prior to the procedure.

At the hospital

You will be screened at the entrance upon arrival and directed to your surgical location. 1 visitor may accompany you to the surgical prep area. It is recommended that your visitor leave during the procedure and rejoin you for the discharge process. Pediatric surgical patients are limited to 2 parents or guardians only. Physical distancing will be adhered to during your entire visit.

Keeping the OR Safe

Surgeons, Anesthesia providers, and Peri-Operative Staff are screened regularly and tested for COVID-19. We utilize robust patient-centered timeouts and checklists to ensure your safety. All providers and staff wear appropriate personal protective equipment (PPE) to reduce the risk of infection. Our goal is to minimize the length of your stay in the hospital.

Getting You Home

In addition to our dedication to the highest quality patient-centered care, MMC uses the latest medical advances to provide you with a safe, fast recovery and shortest possible hospital stay. Prescriptions may be picked up upon discharge from our Rx pharmacy, allowing you to avoid extra stops on the way home.

Keeping everyone safe

Protecting Patients, Visitors and Staff

• COVID-19 tests for patients and staff
• Screening call for COVID-19 symptoms and history
• Dedicated operating rooms and post-operative rooms
• Antimicrobial curtains that ensure patients’ privacy and safety in all preoperative and post-operative patient areas
• Strict hand hygiene and availability of hand sanitizer in all employee and patient areas
• Visitor restrictions in patient care areas
• Wearing face masks is required at all times
• Frequent updates provided to your family or designee
• Minimize your time in the hospital setting
• Checklists to ensure your safety
