

Monmouth Medical Center Southern Campus

Monmouth Medical Center Southern Campus (MMCSC), located in Lakewood, is a fully accredited acute care hospital dedicated to providing high-quality health care services to the community. An RWJBarnabas Health hospital, Monmouth South is a sister hospital to Monmouth Medical Center in Long Branch and, together with Rutgers Cancer Institute, the state's only National Cancer Institute-designated Comprehensive Cancer Center, provides patients access to the most advanced cancer treatments including clinical trials, cellular therapies, complex surgical procedures and sophisticated radiation therapy techniques.

MMCSC is the only hospital in the region to offer private rooms on all of its inpatient units, providing an environment more conducive to healing. Most recently, MMCSC opened a Medical/Surgical Behavioral Specialty Unit, dedicated to the comprehensive care of patients with behavioral health needs.

MMCSC also offers a state-of-the-art Geriatrics Institute that provides integrated inpatient and outpatient geriatric services to patients 65 and older. The James and Sharon Maida Geriatrics Institute complements the Geriatric Emergency Medicine Unit, which addresses the complex needs of aging patients in emergency care, and the Acute Care for Elders Unit, a single-room inpatient unit. MMCSC continues to expand its surgical services and is introducing a Minimally Invasive Surgical program.

The Jacqueline M. Wilentz Breast Center at MMCSC offers comprehensive services including 3D screening and diagnostic mammography, ultrasound, MRI, stereotactic breast biopsy, surgery and consultation, and genetic counseling. MMCSC offers Outpatient Rehabilitation in areas such as Oncology, Cardiac, Pulmonary, and Physical and Occupational Therapy.

MMCSC is committed to helping patients live their best lives by getting them back to the activities that are most important to them.
