

To meet the healthcare needs of our community well into the future, Robert Wood Johnson University Hospital Hamilton is focused on providing the very best facilities. Renovations are underway in our Cardiology Department and our Cancer Center.

As part of a system-wide initiative to increase access to a comprehensive range of essential cardiac care for residents throughout New Jersey, we have secured approval from the New Jersey Department of Health (NJDOH) to perform elective, or non-emergent, angioplasty procedures. This approval will enable residents of Mercer County and central New Jersey to receive premier quality elective cardiac procedures in a comfortable setting close to home, allowing patients' primary care physicians and cardiologists to participate in care decisions and improve outcomes.

In addition to a renovated facility, the multidisciplinary team at Robert Wood Johnson University Hospital (RWJUH) Hamilton includes nationally-recognized experts in surgical, medical and radiation oncology, as well as oncology-certified nurses, support services team members, and nurse navigators to serve as a resource and to help guide you through your cancer journey. Through our partnership with Rutgers Cancer Institute of New Jersey, the state's only national Cancer Institute (NCI)-designated Comprehensive Cancer Center, Robert Wood Johnson University Hospital Hamilton provides patients access to the most advanced treatment options including complex surgical procedures, clinical trials, precision medicine, immunotherapy, and advanced radiation oncology techniques.

WE MADE AN IMPACT TOGETHER

Cancer Center Renovations Supported by our Donors

The Joshua Harr Shane Foundation and the Young Professionals Group of RWJUH Hamilton collectively donated \$100,000 (\$50,000 each) to renovate all 8 of the exam rooms in the Cancer Center at RWJUH Hamilton. The Exam Rooms being renovated was the final phase in the Cancer Center renovation; renovation began in 2018 and all were supported through dollars raised by the Foundation.

Successful event supports complimentary therapies

Thanks to donor support and the success of our We Vs. C event, RWJUH Hamilton offers oncology patients a full range of holistic programming. Addressing physical, emotional, mental, social and spiritual health, our team is able to create a personalized care plan centered on natural remedies to complement existing treatment plans prescribed by our medical team.

Patients and their families benefit from our holistic approach to healthcare while at RWJ Hamilton and The Cancer Institute of New Jersey Hamilton. What is even more special about this program, is it is 100% funded by our community donors.

Transportation should never be a barrier to healthcare

Thanks to generous gifts to our Patient Assistance Fund, RWJUH Hamilton is proud to offer seniors and visually impaired patients access to our Ride Provide Program. The program, in partnership with community-based, nonprofit transportation service Greater Mercer Ride Provide, ensures that those in need don't miss necessary appointments. Last year, more than 900 patients were helped through Ride Provide. For more information on this program, call 609-452-5144 or email Info@RideProvide.org

With your help, we can do even more!
