Last Updated: 10 October 2016

1. Navigate to <http://receiver.citrix.com>
2. Click the blue "Download Receiver (version number) for Windows" button.

3. If prompted to save or run the CitrixReceiver.exe installer click on the Run button.

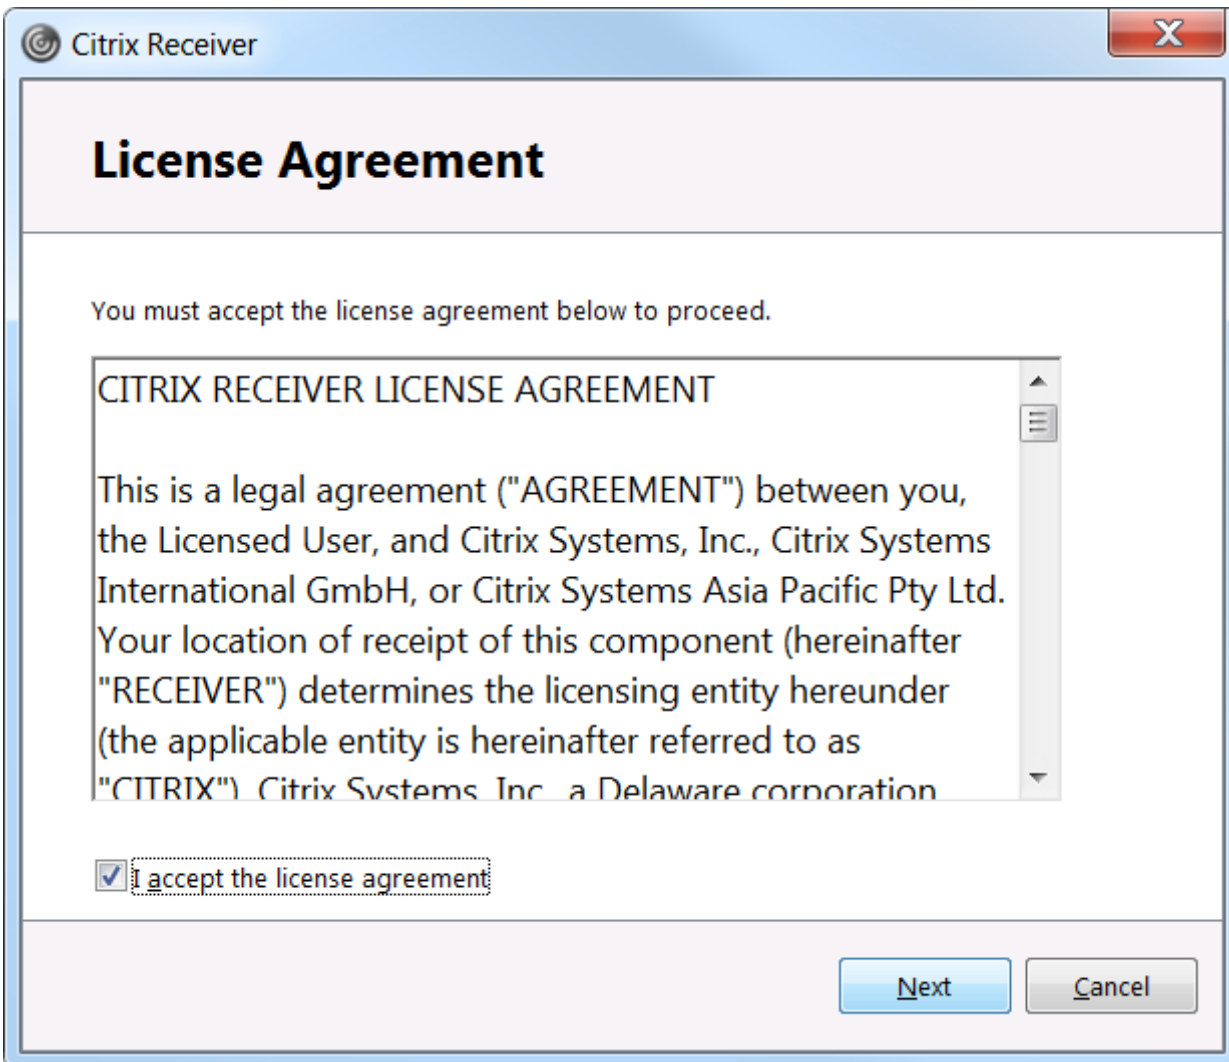

**Note:** If you are unable to run the file, you can choose to save it. After the file is saved, you can then run the CitrixReceiver.exe installer. The file size may vary.

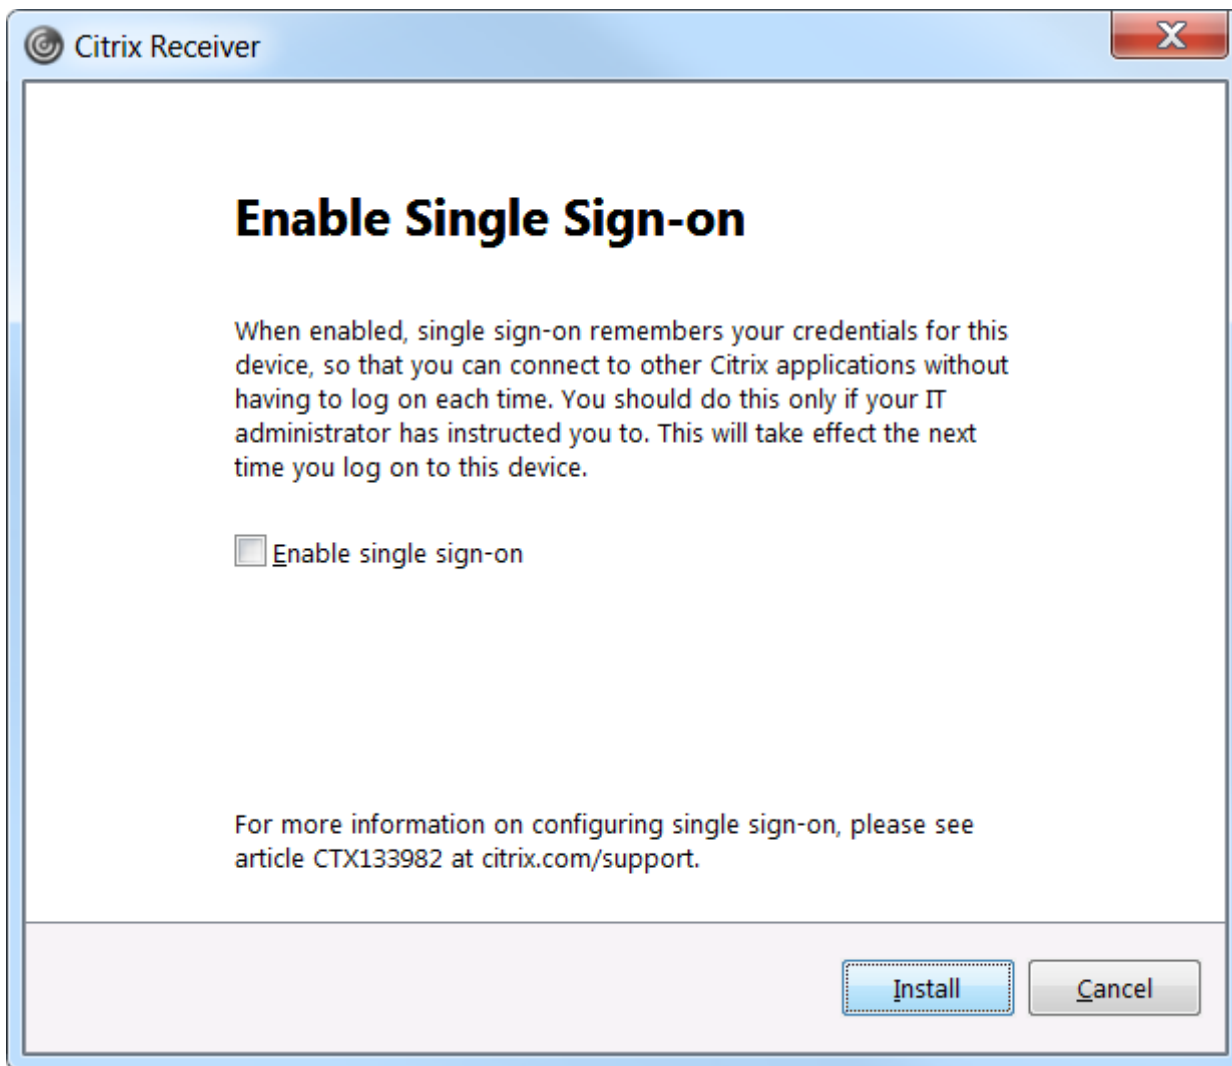

4. The Citrix Receiver installation window should now appear. Click on the Start button.

5. Check the "I accept the license agreement" checkbox, then click on the Next button.

6. Click on the Install button.

7. Once the program finishes installing, you should see the screen pictured below. From here there are two options:
- You can click the Finish button, then proceed to access the Citrix applications through the web at <http://rwjra.rwjh.edu>
  - You can click the Add Account to configure the Citrix Receiver application on the computer and access Citrix applications through the receiver directly. Note that this method is not recommended for shared PCs. Follow the steps provided in Configure Citrix Receiver.
- Note:** If you choose option A, you can always configure citrix receiver later. If you choose option B, you can still access your applications through <http://rwjra.rwjh.edu>.

**CITRIX**  
**Receiver**

## Installation successful

If you received instructions to set up Citrix Receiver with your email or a server address, click Add Account. Otherwise, click Finish, and you can set up an account later.
