

PEDIATRIC RHEUMATOLOGY

WHAT WE TREAT

The Pediatric Rheumatology Program at The Bristol-Myers Squibb Children's Hospital at Robert Wood Johnson University Hospital offers an interdisciplinary, multifaceted rheumatology program for the children of New Jersey.

We provide the best possible patient care for children with rheumatologic disorders and conduct clinical and translational research in the causes and treatment of these complex disorders.

Rheumatic diseases in children are complex, chronic conditions with fluctuating courses that frequently go undiagnosed or misdiagnosed.

Those disorders can have a significant effects on physical function and quality of life, therefore early diagnosis is essential to properly manage these children to prevent potential long-term complications affecting growth, development and quality of life.

Rheumatic diseases are diverse and frequently involve several areas of the body including joints, muscles, the spine and the skin.

Order of disease:

- Juvenile arthritis
- Spondyloarthropathy
- Psoriatic arthritis
- Systemic arthritis
- Systemic lupus erythematosus
- Mixed connective tissue disease
- Juvenile dermatomyositis
- Vasculitides
- Periodic fever syndromes
- Systemic sclerosis
- Linear scleroderma
- Morphea
- Hypermobility syndromes
- Lyme arthritis
- Reactive arthritis
- Fibromyalgia and musculoskeletal pain syndromes
- Other autoimmune diseases

PEDIATRIC RHEUMATOLOGY

The Pediatric Rheumatology Program at The Bristol-Myers Squibb Children's Hospital (BMSCH) at Robert Wood Johnson University Hospital provides comprehensive inpatient and outpatient care for the full spectrum of pediatric rheumatologic diseases.

Our recently expanded team now offers increased provider coverage and decreased wait times for patient appointments.

Through the expertise of our faculty, staff, and consultants, we provide diagnosis, education, and treatment as well as follow-up care.

Patients and their families benefit from the onsite resources of an academic medical center.

They also have access to the resources of New Jersey's only Pediatric Academic Health Campus which features The Bristol-Myers Squibb Children's Hospital for pediatric acute-care, The Child Health Institute at Rutgers Robert Wood Johnson Medical School for research and diagnosis and Children's Specialized Hospital for rehabilitation.
