

# SURGICAL ONCOLOGY PROGRAM

## ABOUT OUR PROGRAM

Rutgers Cancer Institute of New Jersey and Robert Wood Johnson University Hospital combine the expertise of fellowship-trained surgeons with advanced technologies and procedures to treat benign and malignant tumors. Minimally invasive and robotic surgery techniques performed by our providers result in improved clinical outcomes and a faster recovery for patients.

Throughout the surgical experience, patients and their families will interact with an interdisciplinary care team including oncology-certified nurses, licensed social workers, dietitians, financial counselors and others.

As part of the state's only National Cancer Institute-designated Comprehensive Cancer Center, our surgeons aim to improve the diagnosis, prognosis and treatment of the entire patient.

## SURGICAL ONCOLOGY LEADERSHIP

Howard L. Kaufman, MD, FACS  
*Chief Surgical Officer*  
*Chief, Division of Surgical Oncology*

David A. August, MD  
*Chief, Gastrointestinal Surgical Oncology*

Shabbar Danish, MD  
*Chief, Neuro-Surgical Oncology*

Todd Demmy, MD, FACS, FCCP  
*Chief, Thoracic Oncology*  
*Associate Chief Surgical Officer*

Lorna Rodriquea, MD, PhD  
*Interim Chief, Gynecologic Oncology*

James Goydos, MD  
*Chief, Melanoma and Soft Tissue Oncology*

Thomas Kearney, MD, FACS  
*Section Chief, Breast Surgery*

Isaac Yi Kim, MD, PhD  
*Chief, Urologic Oncology*

Andrew Zloza, MD, PhD  
*Chief, Surgical Oncology Research*

# SURGICAL ONCOLOGY PROGRAM

This program offers surgical expertise for a number of conditions:

Bladder cancer  
Brain and spine tumor  
Breast cancer  
Gastrointestinal cancer  
Head and neck cancer  
Hepatobiliary cancer  
Gynecologic cancer  
Kidney cancer  
Liver and bile duct cancer  
Lung cancer  
Melanoma  
Pancreatic cancer  
Prostate cancer  
Sarcomas  
Stomach cancer  
Testicular cancer  
Thoracic cancer

## UNIQUE CAPABILITIES

- Tumor specific surgical expertise in routine, rare and complex cancers.
- Coordination with medical oncologists, radiation oncologists, pathologists and radiologists to create a customized treatment plan.
- Access to advanced diagnostics and treatments, such as minimally invasive surgery, both robotic and laparoscopic.
- Access to the latest clinical trials including precision medicine and immunotherapies.
- Continuous communication with referring and community physician partners.
- Robust cancer support infrastructure to meet the psychosocial, financial, and educational needs of patients and their families.
