

PEDIATRIC HEMATOLOGY/ONCOLOGY PROGRAM

At The Bristol-Myers Squibb Children's Hospital at Robert Wood Johnson University Hospital, we offer a dedicated team of specialists that works together to meet the unique challenges of caring for children with cancer.

As the flagship hospital of Rutgers Cancer Institute of New Jersey, the only NCI-designated cancer center in the state, BMSCH offers the most advanced approaches to cancer care and the treatment of blood disorders, using sophisticated techniques in diagnosis, surgery and chemotherapy and radiation therapy.

Pediatric Cancers and Blood Disorders Treated

- Hemophilia
- Hodgkin's Lymphoma
- Non-Hodgkin's Lymphoma
- Sickle Cell Disease
- Leukemia
- Solid Tumors
- Bone Cancer
- Blood Cancer
- Thrombosis

Program Highlights

- Experienced staff of seven pediatric hematologist/oncologists.
- Only pediatric hematology/oncology program in the state
- Immediate access
- Survivorship program
- Long-term therapy for chemotherapy
- Access to the latest in clinical trials and drug protocols
- Personalized medicine with genetic tumor testing

Treatment options

Surgery

- Minimally Invasive
 - Including pediatric neurosurgery
- Traditional Open
 - Including pediatric neurosurgery
 - Chemotherapy
 - Radiation Oncology
- Gamma Knife

Palliative Care/PACCT Program

The Pediatric Advanced Comprehensive Care Team (PACCT) Program is a unique program that addresses end of life issues and is an integral part of the Pediatric Hematology/Oncology Program's "total" commitment to patient and family-centered care. Physicians, nurses, counselors who have cared for children from initial diagnosis through subsequent treatments continue to be the individual professionals that care for the children at home through to end of life with the palliative care services program.
