

# THE COMPREHENSIVE STROKE CENTER

## ABOUT THE COMPREHENSIVE STROKE CENTER

- At RWJ, we treat more patients with intravenous t-pa than any other hospital in the region.
- RWJ's multi-disciplinary team which includes an Interventional neuroradiologist, interventional neurologist and endovascular neurosurgeon offers patients the best possible care from every specialty.
- RWJ provides stroke education to other institutions, healthcare professionals and emergency medical services, including our own annual Stroke Conference.
- We were awarded the 2013 "Get With the Guidelines Gold Plus" Award by the American Heart Association and are also part of the "Target Stroke Honor Role."
- We are actively involved in clinical trials that help us to provide the most advanced stroke care possible.

# THE COMPREHENSIVE STROKE CENTER

RWJ is a designated Comprehensive Stroke Center by both the Joint Commission and New Jersey Department of Health and Senior Services. The depth and breadth of our services extends beyond the traditional treatments, offering patients and physicians access to cutting edge technologies and research.
