May is National Stroke Awareness Month

While each individual may experience different stroke symptoms, the ones below are most common. Time is crucial when treating and recovering from a stroke. Act quickly. Don’t wait. Stroke is a medical emergency and every second counts.

**B**ALANCE  Loss of balance, headache/sudden or “thunderclap” headache or dizziness

**E**YES  Blurred vision

**F**ACE  One side of the face is drooping

**A**RMS  Arm or leg weakness

**S**PEECH  Speech difficulty

**T**IME  Time to call for ambulance immediately
