

The Emergency Department at Cooperman Barnabas Medical Center is reimagining the way emergency medicine is delivered. The expanded Emergency Department provides the enhanced environment for a new approach to care, ready to accommodate up to 130,000 adult and pediatric patients annually.

Driving this transformation is a groundbreaking care model. “With a focus on the patient being the center of the team, we have changed our care model resulting in a much better experience for our patients as well as our staff,” states Eric Handler, DO, Chairman, Emergency Medicine, Cooperman Barnabas Medical Center.

Patients arriving at CBMC’s Emergency Department are:

- ▶ Greeted by a triage nurse
- ▶ Asked the reason for the visit and five quick intake questions
- ▶ Assigned a bed in the care area that fits their needs
- ▶ Met by a provider in their room within 30 minutes of arrival

In the month of May, on average patients saw a provider within 12 minutes of entering the facility.

This initiative could not be successful without an exceptional team. The Cooperman Barnabas Emergency Department is proud to employ more than 60 expert providers, including board-certified physicians, physician assistants, and nurse practitioners, alongside outstanding nurses and dedicated staff.

“During a time when healthcare staffing remains an industry-wide concern for both facilities and patients, having a fully staffed Emergency Department has played a key role in improving our speed and efficiency,” adds Richard L. Davis, CBMC President and CEO.

Innovations like this would not be possible without the tremendous philanthropic support of friends like you. Thank you for your shared commitment to the health of our community.
