The 28th Annual Transplant Surgeon Designee Symposium for Chronic Kidney Disease Professionals

This symposium is designed to provide the necessary knowledge and skills for kidney health care professionals who wish to broaden their knowledge of kidney and pancreas transplantation as a treatment modality for their CKD patients. It is specifically designed for dialysis nurses, patient care technicians, dialysis social workers and dietitians. The symposium will also provide initial and re-certification for Transplant Surgeon Designees.

Objectives:

Upon completion of this program, participants will be able to:

- Describe two ethical issues in patients with chronic kidney disease
- Identify two potential surgical complications in kidney transplant recipients
- Identify key concepts in kidney selection criteria
- Discuss key components of altruistic donation, kidney paired donation, and compatible share donation and how this information is relayed to transplant recipients and living donors.
- Identify at least two key considerations in the psychosocial evaluation and management of transplant patients and living donors
- Discuss how the kidney procurement process affects kidney transplant outcomes in transplant recipients

*Certification:

Upon successful completion of the symposium, all participating RNs will be certified as 2018 Transplant Surgeon Designees according to the guidelines established by The Renal and Pancreas Transplant Division at Saint Barnabas Medical Center.
