Dear Friends,

As the weather improves and days get longer, it is a wonderful time of year to take advantage of the outdoors to improve your health. Walking is one of the best forms of aerobic exercise and is one of the easiest ways to increase your physical activity. Keeping everything else constant, walking an extra 20 minutes a day will burn off seven pounds of body fat per year. But, before starting any exercise plan, we encourage you to speak with your physician to determine what activity is best for you.

Inside this issue you will find a variety of topics ranging from integrative medicine to geriatric health. Minal Vazirani, MD, FACP, FAAP, FABIHM, recently joined the Siegler Center for Integrative Medicine located at the Barnabas Health Ambulatory Care Center. Dr. Vazirani is board certified in Internal Medicine, Pediatrics and Integrative Holistic Medicine. She has expertise in both traditional and complementary medicine and offers our community an innovative, comprehensive and holistic approach to care.

The Geriatric Health Center recently opened to promote the overall health of aging adults, as well as the prevention and treatment of disease and disabilities that may occur as people age. Under the direction of Theresa Redling, DO, FACP, board certified in Geriatrics, Internal Medicine, and Hospice and Palliative Care, the Center is tailored to provide comprehensive services with a focus on individuals with complex medical needs and/or cognitive impairment.

We understand that nothing is more important than your health. We are pleased to have close to 1600 physicians on our medical staff representing approximately 100 specialties should you need medical care. To help you remain healthy, we encourage you to take advantage of the numerous health education programs both at our facilities, as well as, in the community.

Sincerely,

Barry H. Ostrowsky

New Geriatric Health Center: Caring for Our Aging Adults

To promote the overall health of aging adults, as well as the prevention and treatment of disease and disabilities that may occur as people age, Saint Barnabas Medical Center has created The Geriatric Health Center. The Center is tailored to provide comprehensive services with a focus on individuals with complex medical needs and/or cognitive impairment.

“Aging does not always mean decline and our Center provides comprehensive individualized care utilizing a multi-disciplinary team,” explains Theresa M. Redling, DO, FACP, a board-certified Geriatrician and Medical Director of The Geriatric Health Center. “For those 65 years or older, our team can work with you to manage and coordinate your care to help you enjoy better health,” she adds. The Geriatric Health Center coordinates health and social services for the elderly and their families, focusing on comprehensive inpatient and outpatient care and education. It provides medical care for older adults, assessment of memory disorders and education and support for individuals and their caregiver.

The Center provides primary and consultative services for individuals suffering from:
- Memory loss and confusion
- Depression and behavioral changes
- Decline in mobility, changes in gait and falls
- Multiple concurrent medical conditions
- Frailty
- A lack of medication management

An accomplished geriatrician, Theresa M. Redling, DO, FACP, is board certified in Internal Medicine, Geriatrics, Hospice and Palliative Care. Most recently, she was in private practice. She also has held the position of Chief of Geriatrics at Beth Israel Medical Center, New York City. Fellowship trained at Mt. Sinai Medical Center, New York, her interests include successful aging, dementia care, management of complex medical issues and education of medical practitioners in care of the elderly.

Lauren Van Saders, APN, is a Gerontological Advanced Practice Nurse with a specialty in Geriatrics and Palliative Care. Her education includes a Master’s degree from The Johns Hopkins University and a post-Master’s certificate in Gerontological Advanced Practice Nursing from the University of Medicine and Dentistry of New Jersey. She is currently a doctoral candidate at Felician College, New Jersey. She is a member of the Gerontological Advanced Practice Nurses.

The Geriatric Health Center is located in the Atkins-Kent Building at 101 Old Short Hills Road, Suite 302, West Orange, NJ. For more information about the services available or to contact Dr. Redling, please call 973.322.6457.
The Barnabas Health Heart Centers offer a single comprehensive adult and pediatric cardiac program with locations throughout New Jersey. Our network of cardiac specialists treats patients close to home with advanced technologies and the benefits of cutting-edge cardiac research.

From heart disease prevention programs and the finest emergency heart attack care to cardiac catheterization, minimally invasive valve and coronary bypass surgery and heart transplant, Barnabas Health Heart Centers are nationally recognized for excellence. We continue to lead the way in offering the newest minimally invasive procedures and catheter-based alternatives to open-heart surgery.

Cardiovascular disease (CVD) is the leading cause of death in the United States. The Barnabas Health Heart Centers want to help you and your family understand more about cardiovascular disease.

Heart Attack Signs and Symptoms

Don’t Wait—Call 9-1-1 Immediately

Barnabas Health Heart Centers remind families to take symptoms seriously and to summon medical assistance by calling 9-1-1 immediately if they think a family member is having a heart attack. Heart disease remains the nation’s number one killer of both men and women.

“If you or a family member are exhibiting signs of a heart attack, call an ambulance instead of attempting to drive to the hospital,” says Gary J. Rogal, MD, Chief of Cardiology for Barnabas Health. “If his or her condition should worsen, there is nothing you can do to help while driving. Ambulance crews have training and equipment to care for heart attack patients while they are being transported to the hospital.” Ambulances are equipped with an Emergency Medical System that can transmit an electrocardiogram (EKG) before the patient reaches the hospital. Based on important information relayed from the field, necessary staff, testing and treatment are made available before the patient’s arrival.

All six of the Barnabas Health Heart Centers located across New Jersey have Joint Commission Certification in Acute Coronary Syndrome and Heart Failure. The accreditation also ensures that emergency and cardiology physicians continually refine and improve the way care is provided in the case of a cardiac emergency including heart attack.

Know Your Risk

When evaluating your risk for cardiovascular disease, multiple factors play a role. Some of those factors can be controlled while others such as gender and family history are beyond one’s control. Factors that can increase risk of cardiovascular disease are:

**Age**
The risk of dying from CVD increases with age.

**Family History**
If your parents had heart disease, your risk increases.

**Race**
African Americans with high blood pressure have an increased risk. Risk is also higher among Mexican Americans, American Indians, native Hawaiians and some Asian Americans.

**Gender**
Men have a greater risk of CVD than women. However, the risk for women increases after menopause.
### Warning Signs of a Heart Attack

The most common symptoms of a heart attack are:

- Uncomfortable pressure, fullness, squeezing, or pain in the center of the chest that lasts more than a few minutes, or goes away and comes back
- Pain that spreads to the shoulders, neck, jaw, arms, or back
- Chest discomfort associated with lightheadedness, fainting, sweating, nausea, or shortness of breath
- Profound fatigue, which may last several days before the heart attack
- The occurrence of any of these symptoms WITHOUT exertion

There are less common warning signs of heart attack that should also be taken seriously, especially if they accompany any of the above symptoms. The intensity of the symptoms is not significant and they may not result in actual pain, reports Dr. Rogal, as for example, shortness of breath is not considered painful.

### Risk Factors You Can Control or Treat

These risk factors can be controlled or treated with help from your healthcare professional and by modifying your lifestyle.

- Cholesterol
- Blood Pressure
- Smoking
- Physical Activity
- Obesity
- Diabetes
- Stress
- Birth Control Pills
- Alcohol and Illegal Drugs

The important feature is that these symptoms are new, possibly subtle, and there is no reason for them (for example, abdominal discomfort without having a recent meal). These less common symptoms include:

- Stomach or abdominal pain
- Nausea or dizziness
- Shortness of breath and difficulty breathing
- Unexplained anxiety, weakness, or fatigue
- Palpitations, cold sweat, or paleness

Not all these signs occur in every heart attack. Sometimes symptoms go away and return. In all cases, a person can lower the chance of dying from a heart attack by recognizing symptoms and getting medical help immediately.

Incorporate Heart Healthy Behaviors into your daily life:

- Quit Smoking
- Increase Physical Activity into Your Lifestyle
- Eat a Varied Diet with Good Nutrition Utilizing Healthy Fats/Oils
- Maintain a Healthy Body Weight for Your Height
- Manage Your Stress Levels
Lakewood resident Joann Stravelakis, former special needs teacher, spent her life caring for others. She tended to her parents who both succumbed to cardiovascular disease. When her sister was diagnosed with ovarian cancer, Joann looked after her until she passed away. Afterwards, she could no longer ignore her own health or the exhaustion and pain. When she finally visited her cardiologist, he sent her for a battery of tests which showed she had five blocked coronary arteries and needed quintuple bypass surgery. Surgery was scheduled for October 29, 2012, the day that Hurricane Sandy hit New Jersey. The day before, Joann was in pain; her jaw and left arm were aching. Her physician advised her to go to Saint Barnabas Medical Center where she was admitted. As the storm was pounding the Jersey shore, Paul Burns, MD, Vice-Chair of Cardiothoracic Surgery for Barnabas Health, performed the surgery. Within a few days, she was released into a rehabilitation facility where she completed her recovery. Today, Joann is feeling more energetic and exercises daily.

Matthew Woods, 50, was an avid soccer player and athlete his whole life. On January 9, 2010, while sitting at home his heart stopped. His wife and young daughter heard a strange noise and found Matt unconscious and not breathing. His wife immediately started CPR while his daughter called 911 and alerted a neighbor. A police officer arrived and quickly hooked up an automatic external defibrillator (AED) to Matt. After three tries, his heart restarted. En route, Emergency Medical Services contacted the Emergency Department physicians at Saint Barnabas Medical Center to prepare the cardiac team for Matt’s arrival.

Matt’s chances of survival were less than 10 percent and, if he recovered, he would likely have suffered significant brain damage. Upon arrival, he was quickly transferred to a Cardiac Catheterization suite where Sabino Torre, MD, interventional cardiologist, performed the cardiac catheterization, opened the blocked artery and inserted a stent. A body cooling protocol was initiated to save brain tissue following his cardiac arrest and he was transferred to the Coronary Care Unit. Matt’s heart and brain would recover but during the resuscitation, food from his stomach had entered his lungs. The food caused infection and inflammation in his lungs which required him to be placed on a ventilator. He also developed acute respiratory distress syndrome.

Once again, his survival was in question so his medical team tried a new state-of-the-art ventilator technology. Matt’s lungs quickly responded and he began to improve. After nearly a month in the hospital, Matt was transferred to a rehabilitation facility and then began an outpatient Cardiac Rehabilitation program. Within a few months, he was back to work, soccer and living life to the fullest.
Reduce Your Cholesterol Level and Help Keep Your Heart Healthy

High cholesterol can affect anyone. It’s a serious condition that increases a person’s risk for heart disease, the number one killer of Americans, both women and men. The higher a person’s cholesterol level, the greater the risk.

Knowing your cholesterol level is important. “People should have their cholesterol level checked starting at age 20, since the process of arterial blockages is a gradual one that happens over time,” explains Claudia Irmiere, RN, APN-C, an advanced practice Nurse with Cardiac Services at The Heart Center at Saint Barnabas Medical Center. She says studies show that heart attacks that occur in people age 50 and above may be the result of plaque that began to form on the inside of their coronary arteries when these people were teenagers.

“Our blood cholesterol level is affected by many factors and choices that we make in our lives that contribute to how high or low our cholesterol will be,” explains Ms. Irmiere. “Fortunately, if you have high cholesterol, there are lifestyle changes you can make to lower it and protect your health.”

Ms. Irmiere stresses that losing weight, eating better and exercising can help lower your cholesterol. To do so, he/she offers the following suggestions:

- Reduce the number of calories you consume to keep your body weight within a normal range for your age and height.
- Limit your saturated fat intake by using lean meats, oils and soft margarines.
- Include more fruits and vegetables in your diet, along with foods rich in fiber, whole grains and omega-3 fatty acids.
- Whether you’re overweight or not, try and get 30 minutes a day of moderate physical activity.
- If you choose to drink alcohol, do so in moderation (no more than one drink a day for women and two for men).
- Don’t smoke and if you do, quit.
- Speak with your doctor about additional lifestyle changes you can make.

“It is never too early or too late to start taking care of your heart,” Ms. Irmiere explains. Becoming aware of your risk factors and making healthy lifestyle changes can make a huge impact on your heart health in the future,” she adds.

For further information regarding cholesterol or heart disease, or to schedule an appointment with a cardiologist on staff at Saint Barnabas Medical Center, please call the Barnabas Health Link at 1.888.724.7123.

FREE WOMEN’S CARDIAC RISK ASSESSMENT

Saint Barnabas Medical Center offers a free Women’s Cardiac Risk Assessment program that brings this important health screening to women of all ages. A 19-question assessment is available at www.barnabashealth.org/womensheart. Responses to questions concerning blood pressure, weight, symptoms, lifestyle, diet and other factors are combined to determine individual risk. The online assessment is designed to show women areas of risk and provide them with information to motivate them to learn more and to take greater responsibility for their cardiovascular health.
For years, Robert Fleischman suffered from snoring and would wake up choking and gasping for air. He found himself tired during the day, constantly yawning and had even fallen asleep during meetings. When a friend suggested he might have sleep apnea, he spoke to his internist who recommended he have a sleep study at The Center for Sleep Disorders at Saint Barnabas Medical Center.

“Snoring, especially heavy snoring, is often associated with a condition known as sleep apnea,” says Mangala Nadkarni, MD, Medical Director of The Center for Sleep Disorders at Saint Barnabas Medical Center.

Sleep apnea is a condition where breathing is frequently interrupted and actually stops during sleep. While patients may not necessarily wake up during the episodes, the quality of their sleep is poor. This can lead to symptoms such as sleepiness during the day, lack of energy, memory problems and, often, can manifest as a mood disorder.

Dr. Nadkarni explains that apart from the symptoms themselves, research has shown that patients with severe sleep apnea are more likely to have high blood pressure that is difficult to treat, heart attacks and strokes. “The good news is that sleep apnea is a condition that can be easily diagnosed and treated,” she adds.

During an overnight stay in a private suite at The Center for Sleep Disorders, initial testing showed that Mr. Fleishman did in fact have sleep apnea. “I was waking up an average of 97 times per hour which I was told was a very bad number,” he explains. After being fitted with a specialized sleep mask, he now sleeps better and is no longer tired during the day. Unlike years past, he was able to stay awake to watch the entire Super Bowl and not fall asleep 15 minutes into the game.

The Center for Sleep Disorders at Saint Barnabas Medical Center is accredited by the American Academy of Sleep Medicine and offers a full range of services used in the evaluation, diagnosis and management of sleep-related disorders in adults and children. The Center is equipped with the latest in monitoring equipment, providing the opportunity for daytime testing and full overnight sleep studies.

To contact The Center, please call 973.322.9800. To learn more about sleep apnea and The Center for Sleep Disorders, watch our videos at www.barnabashealth.org/sbmc and click on Videos from the home page.
Saint Barnabas Medical Center was honored with an “A” Hospital Safety Score by The Leapfrog Group, an independent national nonprofit run by employers and other large purchasers of health benefits. The A score was awarded in the latest update to the Hospital Safety Score®. The A, B, C, D or F scores assigned to U.S. hospitals were based on preventable medical errors, injuries, accidents, and infections. The Hospital Safety Score was compiled under the guidance of the nation’s leading experts on patient safety and is designed to give the public information they can use to protect themselves and their families.

“Saint Barnabas Medical Center is proud of this recognition. The Leapfrog Group score is representative of our organizational commitment to patient safety. This recognition is important to our goal of maintaining excellence and continually improving the care we provide to our community,” states John F. Bonamo, MD, MS, President and Chief Executive Officer, Saint Barnabas Medical Center.

“Hospitals like Saint Barnabas Medical Center that earn an “A” have demonstrated their commitment to their patients and their community,” said Leah Binder, President and CEO of The Leapfrog Group. “I congratulate Saint Barnabas Medical Center for its safety excellence, and look forward to the day when all hospitals will match this standard.”

Health Coach 4 Me: On-Line Website to Help You Track Your Health Goals

You’re busy. You have health goals that you think about, but life gets in the way. To help, you now have access, via the SBMC website – barnabashealth.org/sbmc, to HealthCoach4Me, provided at no cost by GlaxoSmithKline.

This easy-to-use interactive web site is designed for people who want to take charge of their health, but need a little help along the way. It offers both consumer health information about many common health conditions as well as a portal to track your health status through a password protected area within the site.

In addition, registering on HealthCoach4Me allows you to:

► Customize your health goals; track your results using interactive assessments, quizzes, diaries, checklists, and action plans; and view your progress on your personalized dashboard
► Select email or text reminders to help you stay on track
► Receive support messages from your family and friends

Log on and check it out and be sure to recommend the site to others who want to take charge of their health!
Free Lung Cancer Screening Program
at Saint Barnabas Medical Center

If you are a smoker or former smoker, you may be eligible for a new Lung Cancer screening program designed to identify lung cancer at an earlier stage. The Saint Barnabas Lung Cancer Institute is offering a free low-dose CT screening program for individuals who are at high-risk for developing lung cancer.

Eligible Individuals Include:
Current or former smokers between the ages of 55 and 74 years of age with a history of 30-pack years or more. (A pack year is the number of packs smoked per day multiplied by the number of years. Example would be: 1 pack/day for 30 years equals 30 pack years.) Former smokers who quit more than 15 years ago are not eligible.

Those ages 50 and older, have a 20-pack years smoking history, and have one of the following:

- Exposure to radon, asbestos, silica, diesel fumes, chromium and nickel
- Personal history of prior lymphoma or smoking-related malignancies such as head and neck cancer, bladder and esophageal cancer
- Family history of Lung Cancer
- Diagnosis of chronic obstructive disease (COPD) or pulmonary fibrosis

Saint Barnabas Medical Center has joined the International Early Lung Cancer Action Program to offer this life-saving test. In high risk people, lung cancer deaths drop by 20% when the cancer is identified early using a low-dose spiral CT scan compared with individuals receiving a chest x-ray. The scan only takes a few minutes and can save your life.

If you believe you may be at risk, please call 973.322.6644 for more information or to make an appointment for this free screening and low-dose CT scan.

EVIDENCED-BASED TOOLS TO QUIT SMOKING
MAY 2; 7:00 PM

West Orange Public Library
46 Mount Pleasant Avenue, West Orange, NJ 07052
One of the hardest addictions to shake is smoking – but quitting is the best decision you will ever make. Whether you’ve tried to quit smoking before or are thinking about it, join Roland Romano, LPC, CTTS, RRT, the Community Outreach Coordinator for the Saint Barnabas Lung Cancer Institute, to get advice on what really works. Registration: 1.888.724.7123.
The Barnabas Health Ambulatory Care Center is pleased to welcome Minal Vazirani, MD, FACP, FAAP, FABIHM to the Siegler Center for Integrative Medicine. Dr. Minal Vazirani recently joined The Siegler Center for Integrative Medicine as its new medical director. She is a dual board certified internist and pediatrician, making her qualified to treat everyone from infants to adults. She is also board certified in Integrative Holistic Medicine. Dr. Vazirani is trained in conventional and alternative medical theory and practice, offering patients an innovative, comprehensive, holistic and progressive approach to care.

She received her bachelor’s degree from The College of New Jersey and received her medical degree from the University of Medicine and Dentistry of New Jersey—New Jersey Medical School (UMDNJ NJMS). She completed her residency in Internal Medicine and Pediatrics at Good Samaritan Hospital and Phoenix Children’s Hospital in Arizona.

Dr. Vazirani was selected to participate in many leadership and educational opportunities throughout her training, and has had the privilege of being mentored by many well-renowned pioneers and experts in the field of integrative medicine. She is also one of only a handful of physicians in the U.S. who has completed an academia-based clinical assessment program in Ayurvedic Medicine.

She continues to travel to India frequently to further her expertise in Ayurvedic Medicine. Dr. Vazirani also teaches at UMDNJ’s Institute for Complementary and Alternative Medicine (ICAM). Dr. Vazirani has dedicated her career to exclusively practicing Integrative Medicine. She is happy to partner with patients and their primary care providers and specialists to provide consultations for safe, integrative and holistic approaches for their medical needs and health optimization on their healing journeys.

APRIL

A MATTER OF BALANCE: MANAGING CONCERNS ABOUT FALLS
Mondays and Tuesdays, 8, 9
10:00 am to 12:00 noon. Conference Room B
Barnabas Health Ambulatory Care Center
200 South Orange Avenue, Livingston, NJ 07039
Falling is one of the most frequent causes of serious injury in older adults. This 8-session workshop is open to anyone who is concerned about falling and interested in fall prevention. Learn how to control your fear of falling and to prevent falls, reducing your chances of fracture and head injury. Space is limited to 15 participants. Participants will learn to:
• View falls as controllable
• Set goals for increasing activity
• Make changes to reduce fall risks at home
• Exercise to increase strength and balance
To register, please call 1.888.724.7123.

NEW MOMS’ CIRCLE
Mondays, April 8, 15, 22, 29; 10:00 to 11:30 am
JCC MetroWest
Women’s Health/Parent Education offers this support group, led by a licensed clinical psychologist specializing in post-partum adjustment, which addresses transitioning to parenthood, mood changes, baby blues vs. postpartum depression and myths of motherhood.
Online reservations required:
www.barnabashealthcalendar.org/sbmc.

BREASTFEEDING SUPPORT GROUP
Mondays, April 8, 15, 22, 29; 11:30 am to 12:30 pm
JCC MetroWest
Women’s Health/Parent Education sponsors this workshop to help new moms achieve the confidence and skills needed for a satisfying nursing experience. Online reservations required:
www.barnabashealthcalendar.org/sbmc.

CELIAC DISEASE SUPPORT GROUP
Tuesday, April 9, 2013, 6:30 – 8:00 pm
Barnabas Health Ambulatory Care Center,
200 South Orange Avenue, Livingston, NJ
Once you or a family member has been diagnosed with celiac disease, where can you go for accurate, up-to-date information? Our support groups can be a great resource for the news about current research, product information and availability, travel ideas, cooking suggestions and other lifestyle tips. Led by a Registered Dietitian, meetings address the challenges of the gluten-free lifestyle and provide a venue for networking, sharing recipes and experiences.
For more information, please call the Kogan Celiac Center at 973.322.7272 or email koganceliaccenter@barnabashealth.org

CANCER SURVIVORSHIP: NAVIGATING YOUR CARE AFTER CANCER TREATMENT
Tuesday, April 9; 6:30 to 8:00 pm
JCC MetroWest
The Saint Barnabas Cancer Program Department of Psychosocial Support Services presents a Cancer Survivorship Lecture Series entitled “Project H.O.P.E.: (Helping Our Patients Excel).”
Registration: 973.322.2671.
**BREASTFEEDING BASICS**  
Tuesday, April 9 and 23; 7:00 to 9:30 pm  
Saint Barnabas Medical Center  
A prenatal workshop to help mothers achieve the confidence and skills necessary for a satisfying nursing experience once their baby is born.  
Fee applies: 973.322.5360.

**HOW YOUR DIET CAN RAISE YOUR BLOOD PRESSURE: WHAT YOU NEED TO KNOW**  
Wednesday, April 10, 12:00 pm  
Multi-Specialty Practice of Westfield, 560 Springfield Ave, Suite 101, Westfield, NJ 07009  
Join physicians from Saint Barnabas’s Multi-Specialty Practice of Westfield to learn how the food choices you make can affect your blood pressure. Registration required: 908.233.8571.

**JOINT REPLACEMENT SEMINAR**  
Thursday, April 11; 6:30 pm  
Springfield Public Library, 66 Mountain Ave., Springfield, NJ  
There’s a difference between feeling one’s age and pain that keeps one from participating in even the most common of everyday activities. For those suffering from chronic hip or knee pain, joint replacement surgery could help. Learn more from Dr. Michael H. Rieber, a recognized expert from The Joint Institute at Saint Barnabas Medical Center in complex reconstructive hip and knee surgery, including the anterior approach for hip replacement. Registration: 1.888.724.7123.

**OSTEOPOROSIS SUPPORT GROUP: LET’S DANCE!**  
Thursday, April 11, 2013, 11:30 am – 12:30 pm  
Conference Room A, Barnabas Health Ambulatory Care Center, 200 South Orange Avenue, Livingston, NJ  
Let’s Dance! Do you want to learn a weight bearing exercise and have fun at the same time? Join us as David Cross, Dance Instructor and Project Healthy Bones Lead Coordinator, shows us how to move! To register or for more information, please call 973.322.7830.

**WHAT TYPE OF EATER ARE YOU?**  
Thursday, April 11; 7:00 to 8:00 pm  
JCC MetroWest  
There is no single right way to eat well. Each approach has its own merits and drawbacks. Debra Gill, PhD, will help you understand your tendencies so you can build on healthy choices and adjust not-so-good-for-you habits. Registration: 973.322.5620.

**IS IT ALLERGENS?**  
Tuesday, April 16; 7:00 to 8:00 pm  
JCC MetroWest  
Although colds and seasonal allergies may share some of the same symptoms, they are very different diseases. Donald B. Perlman, MD, an Allergy and Immunology specialist, will review how to differentiate between the two and treatments that can help alleviate the symptoms. Registration: 973.322.5620.

**CYSTIC FIBROSIS PARENT SUPPORT GROUP**  
Wednesday, April 17; 7:00 pm  
Barnabas Health Ambulatory Care Center  
In this supportive and nurturing environment, parents of children with Cystic Fibrosis meet to share and discuss a variety of issues such as improving adherence, nutrition and coping with a chronic illness. Led by a social worker, the group is open to community members with a child diagnosed with Cystic Fibrosis. To learn more, contact Judy Epstein, MSW, LSW at 973.322.7600 or jepstein@barnabashealth.org.

**FREE HIGH-RISK LUNG CANCER SCREENING**  
Thursday, April 18; 11:00 am  
South Orange Senior Circle, Baird Community Center, 5 Mead Street, South Orange, NJ  
When caught early, lung cancer is most curable. If you are a current or former smoker, you may be eligible for a free high-risk lung cancer screening program provided by The Saint Barnabas Lung Cancer Institute. Registration: 1.888.724.7123.

**MATURE ORIENTATION AND TOUR**  
Saturday April 19 or 21; 2:00 pm or April 28; 7:00 pm  
Saint Barnabas Medical Center  
A free presentation and tour designed for expecting mothers interested in or planning to deliver at Saint Barnabas. Online reservations are now required: barnabashealthcalendar.org/sbmc.

**RELAXING BIRTH CLASS**  
Tuesday, April 20; 9:00 to 11:30 am  
Saint Barnabas Medical Center  
A mini-workshop specifically for those planning a natural birth at Saint Barnabas. Non-pharmacological coping skills, birthing ball, water therapy and other holistic modalities will be covered. Fee applies: 973.322.5360.
CANCER SURVIVORSHIP: MANAGING CANCER-RELATED FATIGUE
Tuesday, April 23; 6:30 to 8:00 pm
JCC MetroWest
The Saint Barnabas Cancer Program Department of Psychosocial Support Services presents a Cancer Survivorship Lecture Series entitled “Project H.O.P.E. (Helping Our Patients Excel).” Registration: 973.322.2671.

CANCER SURVIVORSHIP: THE BENEFITS OF EXERCISE FOR CANCER SURVIVORS
Tuesday, April 30; 6:30 to 8:00 pm
JCC MetroWest
The Saint Barnabas Cancer Program Department of Psychosocial Support Services presents a Cancer Survivorship Lecture Series entitled “Project H.O.P.E. (Helping Our Patients Excel).” Registration: 973.322.2671.

MAY

Saint Barnabas Medical Center  
A free presentation and tour designed for expecting mothers interested in or planning to deliver at Saint Barnabas. Online reservations are now required: barnabashealthcalendar.org/sbmc.
SimpleMeals

PAN SEAR ATLANTIC SALMON OVER A SUMMER QUINOA SALAD
SERVES 4 PEOPLE

Ingredients
- 12 Ounces salmon filet
- 2 Cups arugula
- 2 Tablespoons diced red onion
- 2 Tablespoons diced walnuts
- ¼ Cup corn kernels roasted
- 1 ½ Cup cooked quinoa
- ¼ Cup grape tomatoes cut in half
- ½ Cup diced mango
- ½ Cup blueberries
- 1 Tablespoon olive oil
- 2 Tablespoons balsamic vinegar
- 1 lemon juiced
- 1 Tablespoon chopped basil
- Salt and pepper to taste.
- Lemons for garnish.

Preparation:
1. Cut salmon into 4-3oz portions. Season with salt and pepper. Pre-heat a sauté pan over medium heat. Add 1 tablespoon of oil. Place salmon filet in pan skin side up cook for 2 min. Turn salmon and cook for an additional 2 to 3 min. Cook until internal temperature is 145°F. Remove from heat and let stand.
2. In a mixing bowl add remaining olive oil, vinegar, lemon juice season with salt and pepper. Add remaining ingredients and mix with dressing.
3. Place 4 equal portions of salad on plates. Top salad with cooked salmon. Garnish with lemon slice and serve.

Chefs Notes: Serve the salmon hot. If you like to have the salmon cold place in the fridge for up to 2 days.

THAI CHILI BBQ RIBS
SERVES 2-3 PEOPLE

Ingredients
- 1 ½ Pounds pork ribs, baby back or side
- 1 Cup water
- 4 Tablespoons oyster sauce
- 2 Tablespoons low sodium soy sauce
- 1 Tablespoon fish sauce
- 1 Tablespoon Black Chinese vinegar (or substitute regular white or apple cider vinegar)
- 1 Tablespoon dark soy sauce
- ¼ Cup maple syrup
- 5 Cloves garlic minced
- 1 Teaspoon piece galangal OR ginger, grated
- 1 Whole fresh red chili, minced, OR 1/2 tsp. cayenne pepper, OR 1-2 tsp. chili sauce (to taste)

Preparation: Pre-heat oven to 300º F
1. Cut the ribs into easy-to-eat segments and place in a large baking pan.
2. Place all remaining ingredients together in a sauce pan. Stir well to dissolve the syrup.
3. Pour the sauce over the ribs.
4. Cover with foil and place in an oven for 1 hr.

To Finish:
5. Cook ribs over a medium-hot grill, brushing over any leftover marinade from the bottom of the pan for the first couple of turns. Grill until the meat is caramelized. Low heat for a longer period is better, otherwise the ribs may burn on the outside.
6. Warm up the reserved sauce and serve together with the ribs. Serve with your favorite sides and green onions. Enjoy

CHILI LIME GRILLED CORN ON THE COBB
SERVES 8 PEOPLE

Ingredients
- 8 Ears fresh corn, in husks
- 4 Tablespoons butter
- Juice of 1 lime
- 1 Teaspoon ground chili powder
- ½ Teaspoon dried crushed red pepper
- Sea salt, to taste
- Freshly ground black pepper, to taste
- Garnish: lime wedges

Preparation:
1. Soak corn in cold water for 10 to 15 minutes. Melt butter over medium heat; stir in lime juice, chili powder, and red pepper.
2. Remove corn from water, and gently pull back husks; remove silks. Brush corn with butter mixture. Pull back husks over kernels, twisting tops to secure husks.
3. Grill corn, uncovered, at medium heat for 25 to 30 minutes, turning several times to cook evenly on all sides. (The outside of corn husks will be charred.)
4. To serve, pull back husks and tie together with a piece of the husk to form a handle for the corn. Season with sea salt and black pepper and extra lime juice.
Women’s Health Council Inaugural Meeting

The Women’s Health Council kicked-off its inaugural meeting with John F. Weekly Chi Kung Class Available to Cancer Patients at Saint Barnabas Medical Center

“Chi Kung for Healing” is now available free to cancer patients and survivors treated at Saint Barnabas and from the community. There is growing evidence that the mind-body practice of Chi Kung, a form of Tai Chi which originated in China as a martial art, has value in treating or preventing many health problems. It involves physical movement, mental focus and deep breathing.

“Our new Chi Kung class is a good fit for those who are undergoing cancer treatment and would like to gently move and strengthen their body and spirit as well as our cancer survivors who have completed treatment and want to maintain good health,” explains Angela McCabe, LCSW, OSW-C, Director of Psychosocial Support Services and Community Outreach at Saint Barnabas.

“Chi Kung for Healing” is part of The Cancer Program of Saint Barnabas’s extensive array of free services available to its patients. Services include individual and group counseling, art therapy, genetic counseling, holistic nurse services like Reflexology and Reiki, and spiritual care. Taught by Miriam Shankman, a certified Chi Kung Teacher and Healer with 16 years experience, “Chi Kung for Healing” meets on Monday evenings.

For more information and to register, please call Ms. McCabe at 973.322.2668.

Congratulations to the Township of Livingston on its Bicentennial

Saint Barnabas Medical Center is proud to be the Black Diamond Sponsor for the Livingston's 2013 Bicentennial Celebration. At a Town Council meeting, John F. Bonamo, MD, MS, President and Chief Executive Officer, Saint Barnabas Medical Center, spoke about the reasons for the Medical Center’s sponsorship and about the long-time connection between Livingston and Saint Barnabas. “Livingston has been home to Saint Barnabas Medical Center since November 29, 1964. Since our beginning, Saint Barnabas has grown from a small community hospital into an award-winning, academic Medical Center that is one of the busiest in the state. We could not have done so without the support of the township and the community. The Bicentennial is our opportunity to thank and assist our town as we celebrate this important milestone.

Under the banner “Livingston at 200,” 12 months of Bicentennial events have been planned, with a theme for each month. For an overview of the twelve months of Bicentennial events and activities, visit the Livingstonat200 Facebook page or go to www.livingston200.com. Congratulations!
Many families are uncomfortable bringing up the topic of final wishes. In fact, most people don’t ever put their requests down on paper. Even though many Americans say they are in favor of advance directives, only few actually write them. Although it is a difficult conversation to initiate, it is important for caregivers to sit down with their loved one to discuss his or her wishes regarding end-of-life care and the measures they want taken in terms of life-sustaining treatment.

For more information about Barnabas Health Hospice and Home Care, please visit www.barnabashealth.org and choose the “Extended Care” tab.

On Tuesday, April 16, 2013, Barnabas Health Hospice and Home Care support National Healthcare Decisions Day – a nationwide event to encourage people to engage in thoughtful advance healthcare planning and to encourage healthcare providers to honor those decisions.

Barnabas Health Hospice and Home Care offer these suggestions to caregivers when approaching the topic of end-of-life care with a loved one:

- If the person says he/she expects to overcome his/her illness, you can suggest that you still need to talk “just in case.”
- You can acknowledge that although you feel awkward bringing up the topic, you would not feel comfortable if you did not inquire about his/her final wishes.
- You can mention that a friend was anguished when his/her parent died because he/she had not made his/her preferences clear or written an advance directive.
- To reduce uneasiness, you can say you want to make an advance directive for yourself and suggest the two of you complete them together.
- For those who argue that it is bad luck or too painful to discuss what he/she wants at the end of life, you should acknowledge the person’s feelings of discomfort, but tell him/her that you do not want to be put in the difficult position of making a decision that may be very different from what he/she desired.

Once complete, it is recommended that you make several copies of your loved one’s advance directive and distribute them to the individual’s physician, attorney and family members. It is also a good idea to keep a copy of the directive in a bedside drawer for emergency medical personnel to refer to if they come in response to a 911 call.

For more information about Barnabas Health Hospice and Home Care, please visit www.barnabashealth.org and choose the “Extended Care” tab.
Saint Barnabas Medical Center has outpatient blood drawing sites for the convenience of those who access health care services in and around the Roseland and Westfield areas,” explained John F. Bonamo, MD, MS, President and Chief Executive Officer of Saint Barnabas Medical Center. He added that, “The sites are designed to provide a continuity of care and availability of medical records for those who are also patients at Saint Barnabas Medical Center in Livingston. “All of the Outpatient drawing stations are staffed by trained phlebotomists, licensed by the New Jersey State Department of Health and Human Services and provide full blood-drawing services and urinalysis. Most insurance plans are accepted and appointments are not necessary. Walk-ins are welcome.
