**For the third consecutive year, Monmouth Medical Center (MMC) has been named to the 2024 Newsweek list of World's Best Hospitals, which recognizes the best medical institutions among 2,400 hospitals across 30 countries.**

MMC is one of 414 U.S. hospitals named to the list and one of just six New Jersey hospitals named. This prestigious award is presented by Newsweek and Statista Inc., the world-leading statistics portal and industry ranking provider. This year MMC was recognized for an additional award, World's Best Infection Prevention Hospitals, identifying which of the U.S. hospitals featured in the national ranking were performing "above national average" based on six reported measures.

"Recognition such as this, and our standing as the hospital with by far the most Leapfrog A's for patient safety in the region, truly reflect the hard work and unwavering commitment of the entire Monmouth Medical Center team," said MMC and Monmouth Medical Center Southern Campus President and CEO Eric Carney. "We are so proud to be listed among the World's Best Hospitals for a third consecutive year based on excellence in both patient experience and quality metrics, and hope this designation is helpful to patients and families seeking the best care for themselves and loved ones." **Scan this code to read more. ►**

Five RWJBarnabas Health facilities were awarded with "A" Hospital Safety Score ratings by the Leapfrog Group and Monmouth Medical Center was one of them!
