

CAPTOPRIL RENAL SCAN

(Pre & post captopril renal scans are performed on the same day. IDX will schedule automatically.)

- **Patient should drink only water (~ 1 liter) and not eat 4 hours before the procedure**
- **If patient is taking an *ACE Inhibitor*, patient should stop taking it for three days prior to procedure. Patient should call their doctor if applicable.**
- **Any questions/concerns – please call Nuclear Medicine.**
